Overall projections vs capacity

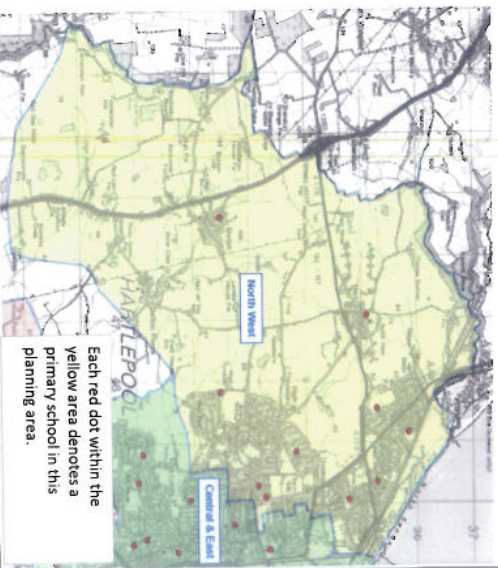

There are ten primary schools in this planning area.

Overall surplus in the primary sector in this area is currently 8.2%, this is expected to reduce to 7% by 2016. This surplus of 7% does not include all potential housing developments in this area, therefore any new developments will reduce the overall surplus further. A developer contribution would normally be required in this area to ensure sufficient school places are available to accommodate both parental preference and make a reasonable offer of a school place in accordance with the School Admissions Code.

The overall surplus capacity in this planning area is predominantly in the years 4-6. The earlier year groups are below the acceptable level of surplus with some year groups having as little as 2% surplus.

In Spring 2016 and Spring 2017 this planning area will have less than 7% surplus capacity in the primary sector.

* Red text denotes less than 7% surplus remaining

% Surplus as at January 2014

Overall projections vs capacity

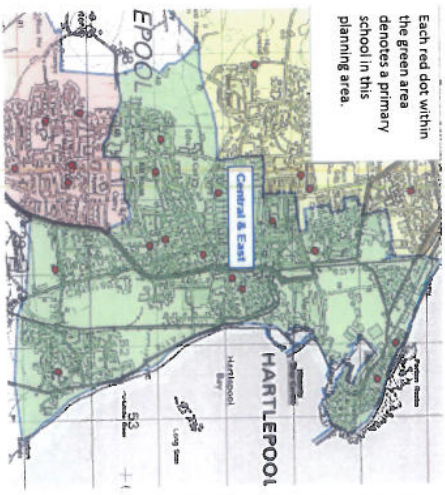

Overall surplus in the primary sector in this area is currently 12.2%, this is expected to reduce to 8.5% by 2017. This surplus does not include all potential housing developments in this area, therefore, any new developments will reduce the overall surplus in this planning area.

A developer contribution would normally be required in this area to ensure sufficient school places are available to accommodate both parental preference and make a reasonable offer of a school place in accordance with the School Admissions Code.

% Surplus by year group

The overall surplus capacity in this planning area is predominantly in the years 4 - 6 which have 17-24% surplus. The earlier year groups currently have an acceptable surplus capacity between 7% and 10%. However, intake into Reception is expected to increase and as smaller year groups leave the schools to progress to secondary education the level of surplus capacity is expected to reduce to below the accepted level.

Each red dot within the green area denotes a primary school in this planning area.

Summary

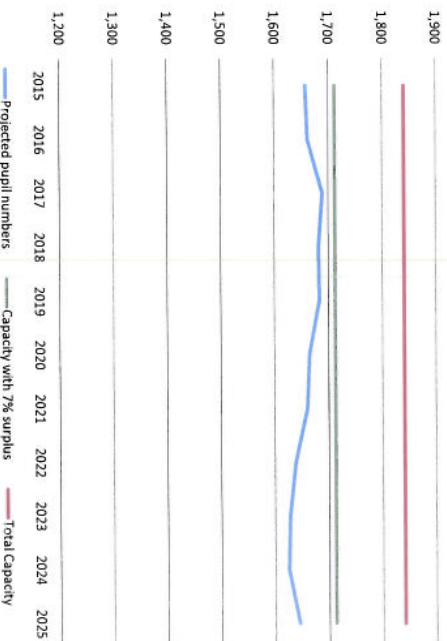

This planning area comprises 6 primary schools and 1 secondary school. This area includes Wynyard Woods.

Overall surplus in the primary sector in this area is currently 10.4%, this is expected to reduce to 8.7% by 2017-18. The 8.7% projected surplus does not include all potential housing developments in this area, therefore, any new developments will reduce the overall surplus.

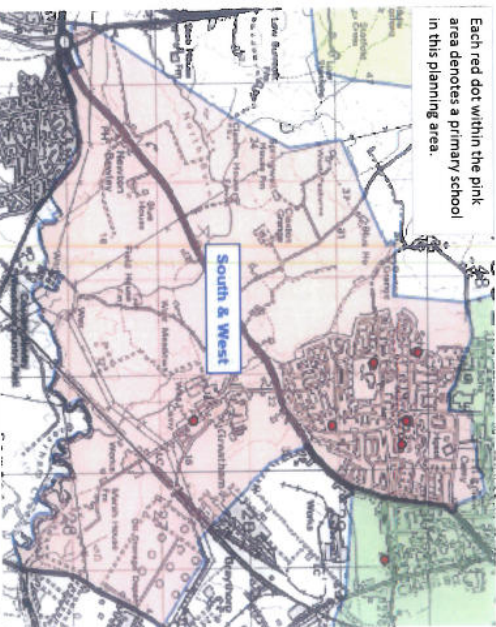

The Local Authority is aware of a significant development proposed to the South West of the town which will reduce the surplus capacity in this planning area. This development includes a site reserved for a new primary school and developer contribution is required to ensure sufficient school places are available to accommodate both parental preference and make a reasonable offer of a school place in accordance with the School Admissions Code. Any additional developments would be subject to developer contributions.

Two schools in this planning area have a surplus capacity above the acceptable level, with one of these schools at approximately 42%; this impacts on the overall surplus within the planning area. A further two schools are at an acceptable level and the remaining two are below the acceptable level with less than 5% surplus.
