

# **ADULT AND PUBLIC HEALTH SERVICES PORTFOLIO DECISION SCHEDULE**

**Monday 28 March 2011**

**at 10.00 am**

**in Committee Room A, Civic Centre, Hartlepool**

Councillor G Hall, Cabinet Member responsible for Adult and Public Health Services will consider the following items.

**1. KEY DECISIONS**

- 1.1 Connected Care Developing the Business – *Director of Child and Adult Services*

**2. OTHER ITEMS REQUIRING DECISION**

- 2.1 Revision of 2011 / 2012 Fees & Charges – Public Protection – *Assistant Director, Regeneration and Planning*
- 2.2 Section 18 Standard for Health and Safety Enforcement – *Assistant Director, Regeneration and Planning*

**3. ITEMS FOR INFORMATION**

- 3.1 Local Autism Action Plan – *Director of Child and Adult Services*
- 3.2 Enablement and Support Services for People with Forensic Backgrounds  
*Director of Child and Adult Services*
- 3.3 Learning Disability Performance and Health Assessment Framework –  
*Director of Child and Adult Services*
- 3.4 Briefing on “No Health Without Mental Health” – The New Strategy for Mental Health in England – *Director of Child and Adult Services*

**4. REPORTS FROM OVERVIEW OF SCRUTINY FORUMS**

No items.

# **ADULT AND PUBLIC HEALTH SERVICES PORTFOLIO**

Report to Portfolio Holder  
28 March 2011

**Report of:** Director of Child & Adult Services

**Subject:** CONNECTED CARE: DEVELOPING THE BUSINESS.

---

## **SUMMARY**

### **1. PURPOSE OF REPORT**

This report provides an overview of Connected Care in Owton Ward and the development of Who Cares (NE), a community interest company (CIC), to commission services for the people living in Owton.

Connected Care's three year contract ends in March 2011. This report evaluates the success of the model and recommends that a further 2 year contract should be extended to fund a pilot project to enable the services to be rolled out and evaluated across the borough.

The report seeks to secure an exception to the contract procedure rules that require a contract valued over £100,000 to go through a tender procurement process.

### **2. SUMMARY OF CONTENTS**

Connected Care is a model which seeks to address fragmented service provision and provide local services that are co-designed and produced by local people and rooted in their local communities.

In 2008 Connected Care went live with a small team of navigators who work with people using low-level interventions and linking them to more specialist services when required.

In 2010 a community interest company (CIC) Who Cares (NE) was set up to develop and commission services to support the people in Owton to live more independently and achieve a better quality of life. The CIC has a Board of Directors drawn from local organisations that have a wealth of experience in developing local community services. Connected Care is embedded in Manor Residents Association, a thriving social enterprise with over 20 years experience of developing local services. It

has deep roots and strong networks into the community and an understanding of what is needed.

Connected Care has been funded by the Department of Health (DoH) as a pilot project as well as Hartlepool Borough Council (HBC), Primary Health Trust (PCT), Housing Hartlepool, Neighbourhood Regeneration Funding (NRF) and a range of funding drawn in by the CIC. Work is currently underway with the London Schools of Economics (LSE) to complete a cost benefit exercise in respect of the money that Connected Care saves a whole range of organisations through its early intervention model.

The services offered by Connected Care and the CIC include:

- A team of navigators working with people on a range of issues and providing timely support to prevent escalation of their difficulties that would require more costly intervention.
- A magazine 'Who Cares' which reaches every home in the Ward
- A handyperson repair service
- Outreach sessions at the local Primary Care Centre
- A Time Bank where people share their skills
- Future Jobs Fund helping people into training and jobs
- A Benefits and Welfare Advice service
- Partnership with Accent Foundation Trust to refurbish flats and support vulnerable young people with their tenancies
- Supported Access to Independent Living Services (SAILS) service providing support to vulnerable older people at home.

Several external evaluations of Connected Care in the last 2 years have all been positive, feedback from local people using the service is excellent and, in April 2009, HBC Scrutiny Forum recommended the roll-out of Connected Care across the town 'as a positive way of helping reach families that would not normally interact with either the Council or engage with health services'

Connected Care has been recognised with a major national award from 'In Control' in respect of being an excellent model of community work that encourages community engagement and participation.

Connected Care has applied to be a “Local Inclusion Lab” (a Cabinet Office Project to tackle multiple disadvantages in the context of the Big Society, efficiency and reform). If successful this will enable Connected Care to draw in further funding, a Community Organiser and business planning skills as well as expertise to evaluate the roll out of Connected Care across the borough. The project runs for 6 months from April – October 2011.

Connected Care is due to be rolled out to the rest of the borough over the next 2 years. Funding is in place from HBC and the PCT to enable this development for the core navigator service. The CIL is drawing in income from Housing Hartlepool, Northern Rock and various other organisations to support the low level services. The intention is to put in place a 2 year pilot enable the roll out of the Connected Care model across Hartlepool. The pilot would be funded from a recurrent PCT/LA budget as well as from re-ablement funding coming over to the council in April 2011.

Connected Care is a model which delivers low-level interventions that prevent or delay the need for more costly services if current needs are left to deteriorate. *This is a cost-effective service that meets the requirements for prevention and reablement, keeping people living independently in their own homes and connected to their communities.* Many people who receive support from Connected Care subsequently become volunteers to give back something to the local community which was there when they needed support. Connected Care is well placed to deliver the roll out of this service across Hartlepool.

This model is founded on effective partnerships and merged funding streams from HBC, NHS, Housing Associations and a range of other sources. It is a model that works and, for that reason, an exemption to the current contract procedure rules that requires a Tender exercise to be used for all contracts over the value of £100,000 is recommended. *The exemption request is based on the recommendation that the 2 year roll out is a pilot project to evaluate the roll out of Connected Care across the borough. Funding for this pilot project would be drawn from £200,000 recurrent PCT/LA sources and £480,000 from the reablement funding for 2011-2013.*

The Connected Care model meets the objectives of localism, the Big Society, place-based funding and empowering local communities. Over the next few months Connected Care/ Who Cares (NE) will be, together with a number of organisations from the Community and Voluntary sector (CVS), exploring the possibility of putting together a joint bid to take over some of the local authority's community centre buildings. Asset transfer would facilitate the development of hubs from which Connected Care could develop the business within local community settings in the North and Central areas of Hartlepool.

**3. RELEVANCE TO PORTFOLIO MEMBER**

Information on the success of Connected Care and the CIC in delivering its objectives together with developmental proposals for the next 2 years which will require an exemption to the current contract procedure of tendering for a contract whose value is in excess of £100,000.

**4. TYPE OF DECISION**

Key Decision – Test (i) and (ii) apply – Forward Plan Reference CAS 88/11.

**5. DECISION MAKING ROUTE**

Adult and Public Health Services Portfolio – 28 March 2011

**6. DECISION REQUIRED**

- Exempt CC from the current procedure of tendering for a contract whose value is in excess of £100,000. This will enable Connected Care, as a pilot project to secure funding which will pump prime the roll out of Connected Care and the CIC across Hartlepool over the next 2 years.
- Continue the Handyperson service for three years to enable this valuable service to continue to support vulnerable and older residents across Hartlepool.

**Report of:** Director of Child & Adult Services

**Subject:** CONNECTED CARE: DEVELOPING THE BUSINESS

---

## **1. PURPOSE OF REPORT**

- 1.1 This report provides an overview of Connected Care in Owton Ward and the develop of Who Cares (NE) a community interest company (CIC), to commission services for the people living in Owton.
- 1.2 Connected Care's three year contract ends in March 2011. This report evaluates the success of this model and recommends that the contract be awarded to Connected Care as a pilot for a further 2 years to enable the model to be rolled out across the borough.
- 1.3 It is recommended that, as a pilot, the Connected Care service is exempted from the contract procedure rules that require a contract valued in excess of £100,000 to go through a tendering process. The Connected Care model is founded on effective partnerships and merged funding streams from Hartlepool Borough Council, the NHS, Housing Associations, Northern Rock and a range of other agencies. It is a model that works and meets the objectives of localism, Big Society, place-based funding and empowering local communities.

## **1. BACKGROUND**

- 2.1 Connected Care was developed following a community-led audit in Owton Ward which highlighted the fragmented nature of services and the problems this caused people trying to access them. The audit identified what people wanted from services: good information, choice, local services delivered by a local workforce and outcomes that made a positive difference to the lives of people in Owton Ward.
- 2.2 Connected Care is an innovative model of service delivery which aims to bridge the gap in adult social care and health provision while ensuring that local communities directly influence the development of services:
  - Breaking down the barriers between organisations
  - Putting people in control of the services they need
  - Involving people in the design and delivery of services
  - Bringing services and communities together to provide webs of support.
- 2.3 Connected Care is able to support people who may not meet the FACS criteria and this contributes to prevention and early intervention initiatives which support people before they require more costly, secondary services.

- 2.4 Connected Care went live towards the end of 2008 with a small team of navigators who work with people using low-level interventions and linking them to more specialist services when required. The navigators work with people on a range of issues including debt, poverty and family welfare, volunteering, employment, health and social care, housing, mediation, home safety and bereavement.

A magazine 'Who Cares' is produced on a quarterly basis and reaches every home in Owton.

In the last 18 months, the navigators have supported over 1200 people to resolve their problems. A significant number of people who have been supported by Connected Care subsequently end up volunteering to put something back into the community which was there for them when they needed help.

- 2.5 In 2010 a Community Interest Company (CIC) Who Cares (NE) was established to develop and commission services to support the people in Owton to live independently and achieve a better quality of life. The CIC has a Board of Directors drawn from local organisations that have a wealth of experience in developing local community services. It has deep roots and strong networks into the community and an understanding of what is needed.
- 2.6 Core funding for the navigator service over the last 3 years has been provided by Hartlepool Borough Council, the Primary Care Trust and the Working Neighbourhood Fund with start-up costs being funded by the Department of Health 'Pathfinder' Pilot. The CIC has levered in funds from a range of organisations such as Housing Hartlepool, Accent Foundation Trust and Northern Rock.
- 2.7 In 2010 Connected Care was recognised with a major national award from the national charity 'In Control' in respect of being an excellent model of community work that is both innovative and successful at addressing people's needs at a community level.

Feedback from people who use the Connected Care Services and detailed outcomes from case studies evidence that local residents find the services accessible, approachable, efficient and helpful in joining up services and helping people access support in a timely way. The independent evaluation by Durham University of Connected Care services, a two year study concluding in early 2010, found that preventative work is being achieved. Access, choice, information, continuity and co-ordination (the outcomes requirements from the community-led audit in 2006) are met by the navigator service.

A second evaluation, independently commissioned by the Regeneration Services of Hartlepool Borough Council, reached the following conclusions:

- Connected Care embodies the Community Strategy's principles of effective partnership working, involvement and inclusion. It has a cross-cutting impact across all of the strategy's aims and is at the forefront of local service providers' approaches to Health and Wellbeing Agenda and
- "Connected Care has improved access to services and delivered a range of outcomes for residents in Owton Ward. It connects strategically and operationally with service providers and has established commitment to secure its immediate future" (Independent Consultants Report, 2009).

2.8 Connected Care contributed to the Hartlepool Health Scrutiny Forum in 'Hard to Reach Families' in early 2009. The findings of the Scrutiny Forum were *'that the Connected Care programme be rolled out across the town as a positive way of helping reach families that would not normally interact with either the Council or engage with health services'*

### 3. CURRENT SERVICES

3.1 The services offered by Connected Care and the CIC include:

- **Navigators** working with people to resolve their problems and in partnership with other providers to influence and improve services. Regular outreach sessions at the Intra Health Primary Care Centre have resulted in a significant number of people registering with a local GP.
- **Handyperson service** that works in partnership with Housing Hartlepool, the Owton and Rossmere Neighbourhood Action Plans and Hartlepool Borough Council. The service has now been rolled out across the town and provides low level adaptations together with a range of practical assistance for older people and people with disabilities. Over 549 people have received services with 251 jobs being completed for people in the last three months. In excess of 40 new clients are seen each month. The demand for this service has seen a rapid growth over the last four months since taking on the local authority contract in October 2010. Occupational therapists refer directly into the service. 54% of users of this service have submitted feedback and comments on the quality of the service and the work undertaken is excellent. Comments, cards and letters are kept on file and provide evidence of the value provided by this service.

- **Time Bank**, developed in 2010, currently has approximately 25 members and 800 hours time-banked. People share their skills which affirm their self-worth and confidence as well as building social capital and community cohesion.
- **Supporting Access to Independent Living Services (SAILS)** currently has approximately 60 people on the programme who are being helped to live independently in their own homes. A range of services are provided including meals, gardening, dog walking and a call back service. This project is run by volunteers with 600 meals delivered and 215 call-backs completed each month. There is a growing demand for this service and clear evidence that it contributes to the delivery of social preventative care for older residents in respect of prevention/delay of entry to residential care, hospital admissions and readmissions. Connected Care is working with health and other local providers to identify potential and emerging funding streams for this valuable service.
- **Benefits and Welfare Advice service** employing a dedicated advice worker and having, to date, assisted 1290 clients and levered in £200,000 in unclaimed benefits.
- **Supported Accommodation Project** for young people designed to achieve positive outcomes for vulnerable young people aged 18-24 years old. This project draws together key partners: Northern Rock Foundation, Manor Residents Association, Connected Care and the CIC, Accent Foundation and Hartlepool Borough Council.
- 37 flats, due for demolition, because the area had become a centre for drugs, crime and vandalism, are being refurbished.
- The project comprises 8 one-bedroom flats, a 2 bedroom house and a 'crash-pad' for emergency use as well as on site office facilities. Connected Care provides a flexible service to the vulnerable young residents including welfare advice, adult education and employment support and assistance to develop independent living skills and sustain their tenancies. The area has been turned round and is a success story for community regeneration.

#### 4. BUSINESS PLAN 2011 – 2013

##### 4.1 Over the next 2 years Connected Care and the CIC will:

- Acquire charitable status for the CIC to increase its ability to compete for a range of funding resources
- Expand the work undertaken with partner agencies to maintain both care navigation and project services
- Maintain a flexible approach that enables an effective response to changing circumstances and the expected growth in demand. This will be achieved by:

- Maintain flexibility in job roles and responsibilities.
- Grow the volunteer base.
- Identify and responding to new and emerging funding streams.
- Work with partners to deliver cost effective services that provide positive outcomes for people.
- Continue improving the services delivered by Connected Care and the CIC including working towards both the MATRIX standard for Advice and Guidance and the Legal Services kite mark for benefits and advice provision.
- Explore business opportunities and potential income sources to be accessed and delivered via the CIC.
- Continue to work with the London School of Economics (LSE) to evidence the savings made through the provision of Connected Care Services.
- Continue to develop the CIC as the commissioning and business development arm of Connected Care.
- Diversify the numbers of funding streams to both maintain and expand provision.
- Incrementally develop and roll out Connected Care, as a PILOT project, across the central and north areas of Hartlepool.  
Connected Care and MIND have recently completed an audit of the Burbank area of Hartlepool – report to be published spring 2011. Information from the audit will be utilised as a basis from which to develop the services identified by people as appropriate to Central Hartlepool.
- Develop a relationship with the emerging GP commissioning consortia to promote Connected Care as a cost-effective investment. *The increasing focus on prevention, early intervention and re-ablement services that delay or prevent admission / readmission to hospital is an agenda that Connected Care is well placed to deliver.*
- Explore, in partnership with a range of Community and Voluntary organisations (CVS), the potential to develop a joint bid to take over some of the local authority's community centre buildings. Asset transfer would facilitate the development of hubs from which Connected Care / Who Carers (NE) could develop the business within local community settings in the North and Central areas of Hartlepool.

## 5. FINANCIAL IMPLICATIONS 2011-2013

5.1 Hartlepool Borough Council and the Primary Care Trust will support Connected Care as a 2 year pilot with the following funding:

- £680,000 in total over two years which will comprise £200,000 from recurrent PCT/LA monies and £480,000 from the £1.3 million reablement funding that is being made available 2011-2013.

- The CIC will draw in additional income from a range of sources including Housing Hartlepool and Accent Foundation. There will also be the potential for maximising income generation through personal budgets, personal health budgets and the GP commissioning consortia. The work being completed by the London School of Economics (LSE) to evidence the cost savings utilised by low-level/preventative interventions will be useful in advocating for funding from a range of agencies ie community safety, education and children's services.
- If Connected Care is successful in being chosen as a "Local Inclusion Lab" (a Cabinet Office sponsored project lasting 6 months from April – October 2011. This project will look at resolving multiple disadvantages in the context of the Big Society, efficiency and reform) there will be opportunities for some limited funding, a Community Organiser, business planning skills expertise and support to evaluate the roll out of Connected Care/ Who Cares (NE) across the borough. Rolling out Connected Care across the borough during this period, if successful in the application process, will maximise the learning and evaluation. Conversely, failure to put a pilot project in place to roll out the model from April 2011 will mean that the potential advantages and learning opportunities arising from the Inclusion Lab will be lost.
- Following a meeting with Dr Posmyk, Dr Wood, PCT commissioners, Gerald Wistow and Connected Care on 22<sup>nd</sup> February 2011 it has been agreed that Connected Care will be part of the Pathfinder application that is being submitted by the nascent GP Commissioning Consortia.

## 6. EXEMPTION FROM CURRENT CONTRACT PROCEDURES

- 6.1 Connected Care is a model which delivers low-level interventions that prevent or delay the need for more costly services if current needs are left to deteriorate. This is a cost-effective service that meets the requirements for prevention and re-ablement, keeping people living independently in their own homes and connected to their communities.

*Connected Care is well placed to deliver the roll out of this service across Hartlepool over the next 2 years. This model is founded on effective, established partnerships and merged funding streams from Hartlepool Borough Council, PCT, Local Housing Associations and a range of other funding sources. It is a model that is unique and has been built upon and rooted in the local community organizations which have dense networks, deep roots and a wealth of experience in growing local services and attracting resources, funding and volunteers. Connected Care is well placed to contribute to helping keep people at home and out of hospital as well as supporting them when they return home from hospital.*

*It is a model that works and which could not be replicated by a tender exercise.*

## **7. RECOMMENDATIONS**

It is recommended that:

1. An exemption to current contract procedure rules are waived so that Connected Care and the CIC can build on their current success and continue, as a 2 year pilot, to roll out this model of service provision to the central and north areas of Hartlepool. The pilot would be subjected to rigorous evaluation over this 2 year implementation period.
2. The Handyperson services contract continues for a further two years and continues to work across the borough of Hartlepool.

## **ADULT & PUBLIC HEALTH SERVICES**

Report to Portfolio Holder

28<sup>th</sup> March 2011

**Report of:** Assistant Director Regeneration & Planning

**Subject:** REVISION OF 2011 / 2012 FEES & CHARGES –  
PUBLIC PROTECTION

---

### SUMMARY

#### **1. PURPOSE OF REPORT**

To consider the annual review of fees and charges in respect of services, licences and registrations undertaken by the Public Protection section of the Regeneration & Planning Division.

#### **2. SUMMARY OF CONTENTS**

The report sets out the services, licences and registrations undertaken under various enactments, together with current and recommended fees for 2011/2012.

#### **3. RELEVANCE TO PORTFOLIO MEMBER**

Portfolio Holder has responsibility for functions within Public Protection, to which these charges apply.

#### **4. TYPE OF DECISION**

Non key.

#### **5. DECISION MAKING ROUTE**

Portfolio Holder decision.

#### **6. DECISION(S) REQUIRED**

To agree the fees and charges for 2011/2012 to be implemented from 1 April 2011.

**Report of:** Assistant Director Regeneration & Planning

**Subject:** REVISION OF 2011 / 2012 FEES AND CHARGES –  
PUBLIC PROTECTION

---

## **1. PURPOSE OF REPORT**

- 1.1 To consider the annual review of fees and charges in respect of services, licences and registrations undertaken by the Public Protection section of the Regeneration & Planning Division.

## **2. BACKGROUND**

- 2.1 Charges for the various services offered by the Public Protection section have been subjected to the annual review. The review has considered both the services provided to clients and the Council's financial position (including the 2011/12 budget process) and charges made for similar services across the Tees Valley.

## **3. PROPOSALS**

- 3.1 The suggested charges for 2011 / 2012 are set out as **Appendix 1**, with the current year's figures in brackets.
- 3.2 Suggested increases in charges are based on:
- (i) an average rise of 2.5%; or
  - (ii) a more accurate reflection of staff resources being utilised; or
  - (iii) bringing charges into line with other Authorities.
- 3.3 Charges have generally been rounded off to the nearest pound where appropriate and are exclusive of VAT.
- 3.4 Based on current service operation the increase in fees will achieve gross additional income of £8,800. However, costs including staff costs have also increased in proportion.

#### 4. SEX ENTERTAINMENT VENUES

- 4.1 At its meeting on 14<sup>th</sup> April 2011 Council will be asked to approve the adoption of a new legislative framework that would introduce new licensing requirements for premises that regularly offer sexual entertainment to its customers.
- 4.2 Should Council agree to the introduction of these new controls, it will be necessary to consider what fees should be charged in respect of the consideration and granting of licence applications.
- 4.3 Premises that wish to be licensed as a Sex Entertainment Venue (SEV) will continue to require a Licensing Act premises licence that authorises the supply of alcohol and the provision of other forms of entertainment that are not of a sexual nature.
- 4.4 The consideration of an application for a SEV licence will require the Council to undertake a process of consultation and, due to the nature of the entertainment being requested, objections should be anticipated. Where objections are received the matter would be referred to a licensing sub-committee for consideration.
- 4.5 Due to the significant amount of work required to process a new application it is proposed that the licence fee be set at a sufficiently high level so as to cover Council costs.
- 4.6 However, once an initial decision has been taken to grant a licence the level of work required to renew that licence on an annual basis would reduce and, as such, it is proposed that the renewal fee be set at a lower level.
- 4.7 The proposed SEV fee structure is detailed below and is based on the current Licensing Act 2003 fees which are linked to the rateable value of the premises. As stated earlier, SEV fees will be in addition to other fees already due and therefore represent additional income.
- 4.8 Finally, there is one premises in Hartlepool that currently operates as a lap dancing club and would require an SEV licence should Council choose to adopt the legislation. The premises in question – *The Little Black Book* in Whitby Street – has been operating for more than two years and appears to be well run with little or no crime and disorder associated with it.
- 4.9 As this premises is already well established it is suggested that it does not require the level of consultation and consideration that a brand new application would warrant and therefore it would be appropriate to regard it as a 'renewal' rather than a new application and, as such, it would be liable to the 'renewal' fee rather than the higher 'new application' fee.

| <b>Rateable Value</b>       | <b>New Application Fee</b> | <b>Renewal application</b> | <b>Variation of Licence</b> | <b>Transfer of Licence</b> |
|-----------------------------|----------------------------|----------------------------|-----------------------------|----------------------------|
| No rateable value to £4,300 | £500                       | £100                       | £100                        | £70                        |
| £4,301 - £33,000            | £500                       | £190                       | £190                        | £70                        |
| £33,001 - £87,000           | £850                       | £315                       | £315                        | £70                        |
| £87,001 - £125,000          | £850                       | £450                       | £450                        | £70                        |

## 5. RISK

- 5.1 There is a risk that the number of licences issued by the Authority may fall due to increased fees, resulting in reduced income and increased enforcement, however, the basis of the charges outlined in section 3.2 represents a reasonable assessment which can be justified to the various service users.
- 5.2 Several of the charges under consideration are statutory fees and therefore increased in line with the national requirement.

## 6. RECOMMENDATIONS

- 6.1 To agree the fees and charges for 2011 / 2012 to be implemented from 1 April 2011.

## 7. CONTACT OFFICER

**APPENDIX 1****LICENCES, REGISTRATIONS AND SERVICES**

|    |   |  |
|----|---|--|
| 1. | <b><u>PET ANIMALS ACT 1951</u></b>                    | £126 (£123) plus any veterinary surgeon's fee where such an inspection is considered necessary.  |
|    | <b><u>ANIMAL BOARDING ESTABLISHMENTS ACT 1963</u></b> | £126 (£123) plus any veterinary surgeon's fee where such an inspection is considered necessary.  |
|    | <b><u>THE BREEDING OF DOGS ACT 1973</u></b>           | £126 (£123) plus any veterinary surgeon's fee where such an inspection is considered necessary for 0-5 breeding bitches, £170 (£165) for 6-10 breeding bitches, Pro-rata for over 10 breeding bitches. |
|    | <b><u>SLAUGHTER ACT 1974</u></b>                      | £50 (£50) Licence to slaughter animals.  |
|    | <b><u>RIDING ESTABLISHMENTS ACT 1964 AND 1970</u></b> | £126 (£123) plus any veterinary surgeon's fee where such inspection is considered necessary.   |
|    | <b><u>PERFORMING ANIMALS</u></b>                      | £126 (£123)  |
|    | <b><u>DANGEROUS WILD ANIMALS ACT 1976</u></b>         | £126 (£123) plus any veterinary surgeon's fee where such inspection is considered necessary.   |
|    | <b><u>VARIATION OF LICENCE</u></b>                    | £58 (£57) plus any veterinary surgeon's fees where such inspection is considered necessary.  |
| 2. | <b><u>COPY OF ANY LICENCE</u></b>                     | £45 (£40) unless cost of copy is a statutory fee.  |
| 3. | <b><u>FOOD SAFETY ACT 1990</u></b>                    |  |
|    | 'Export' Certificates                                 | £70 + VAT (£67)  |
|    | Food Condemnations                                    |  |
|    | - Certificate and removal                             | £80 + VAT (£77) for up to 1 hour - additional time at £42/hr (£40). Plus the costs incurred by the Department for removal.   |
|    | - Certificate only                                    | £63 + VAT (£60)  |
|    | Level 2 Award in Food Safety                          | £55 + VAT (£52) – In line with Adult Services  |

**FOOD SAFETY ACT 1990 (continued)**

|  |                               |
|--|-------------------------------|
| Level 3 Award in supervising food safety in catering | £198 (£195)                   |
| Tees Valley Food Hygiene Award Re-Rating visit       | £150 (£150) (Tees Valley Fee) |

5. **LOCAL GOVERNMENT (MISCELLANEOUS PROVISIONS) ACT, 1982**

Acupuncture, tattooing, ear piercing, electrolysis

|            |             |
|------------|-------------|
| - premises | £126 (£123) |
| - person   | £63 (£62)   |

6. **SEX ESTABLISHMENT**

|             |               |
|-------------|---------------|
| New licence | £1280 (£1250) |
| Renewal     | £370 (£360)   |

7. **STATEMENT OF FACT**

|                                      |           |
|--------------------------------------|-----------|
| £110 for up to 2 hours officers time |           |
| Cost /hr thereafter                  | £55 (£52) |

8. **LOCAL GOVERNMENT (MISC. PROV.) ACT 1976****Hackney Carriages and Private Hire Licences:**

|   |  |
|---|--|
| Hackney Carriage Vehicle                    | £245 plus vehicle inspection fee (approx £65) = £310 |
| Hackney Carriage Driver                     | £67 (£67)  |
| Private Hire Vehicle                        | As Hackney Carriage                                  |
| Private Hire Driver                         | As Hackney Carriage                                  |
| Dual Driver                                 | £95 (£95)  |
| Transfer of Vehicle ownership               | £30 (£30)  |
| Replacement Vehicle                         | £70 (£70)  |
| Renewal of Backing Plates                   | £30 (£30)  |
| Knowledge Test Re-test (and non appearance) | £20 (£20)  |
| Replacement drivers badge                   | £10.50 (no previous charge)                          |
| Replacement roundals                        | £5 each (no previous charge)                         |

**Private Hire Operators**

£310 plus £10 per vehicle Max £550 (£300 plus £10 per vehicle Max £500)

9. **STREET TRADING**

All fees include a £50.00 non-refundable application charge, which will be retained by Hartlepool Borough Council, should an application be refused or withdrawn.

| <b>Street Trading Consents</b> | 0500 hrs – 2100 hrs<br>(1800 hrs) |         | 2100 hrs – 0500 hrs |         |
|--------------------------------|-----------------------------------|---------|---------------------|---------|
| Annual                         | £1150                             | (£1120) | £2300               | (£2240) |
| Half Yearly                    | £690                              | (£672)  | £1380               | (£1345) |
| Monthly                        | £175                              | (£170)  | £350                | (£340)  |
| Weekly                         | £118                              | (£115)  | £235                | (£230)  |
| Daily                          | £60                               | (£58)   | £120                | (£115)  |

**Street Trading Licence**

|        |      |         |
|--------|------|---------|
| Weekly | £118 | ( £115) |
| Daily  | £60  | (£58)   |

Where attending Thursday open market, Farmers Market or Maritime Festival, the above fee will not be charged as it is covered in the existing charges.

10. **LICENSING ACT FEES AND CHARGES (Statutory Fees)**

| Band | Rateable Value             | Variation Fee<br>and New Applications |  | Annual Fee |
|------|----------------------------|---------------------------------------|--|------------|
| A    | No rateable value to £4300 | £100                                  |  | £70        |
| B    | £4301-£33000               | £190                                  |  | £180       |
| C    | £33001-£87000              | £315                                  |  | £295       |
| D    | £87001-£125000             | £450                                  |  | £320       |

**MINOR VARIATION FEE £89****LICENSING ACT FEES AND CHARGES (Statutory Fees)**

|    |                   |       |       |       |       |
|----|-------------------|-------|-------|-------|-------|
| D* | See Note 1 below  | £900  | £1000 | £900  | £640  |

|     | Charge for standard pitch. (Plus proportional increases dependent on additional space used by traders). | £25 (£22)             |
|     | Charge during January and February for stall-holders with full attendance.                              | £18 (£16)             |
|     | Additional charge for casual traders for the 4 weeks running up to Christmas.                           | £5                    |
|     | If holiday is taken or any other absence without notification a service charge will be levied.          | £7 (£6)               |
|     | If payment is not received at the Civic Centre by 12 noon on market day, an admin charge will be made.  | £6 (£6)               |

## **ADULT & PUBLIC HEALTH SERVICES PORTFOLIO**

Report to Portfolio Holder  
28 March 2011

**Report of:** Assistant Director Regeneration & Planning

**Subject:** SECTION 18 STANDARD FOR HEALTH AND SAFETY  
ENFORCEMENT

---

### SUMMARY

#### **1. PURPOSE OF REPORT**

To inform the Portfolio Holder of the progress made in meeting the Council's statutory obligations under Section 18 of the Health and Safety at Work etc Act 1974 and to seek approval of an action plan to fulfil unmet requirements.

#### **2. SUMMARY OF CONTENTS**

The report gives details of the Council's statutory obligations under Section 18 of the Health and Safety at Work etc Act 1974, progress made in meeting the requirements and a proposed action plan to fulfil the unmet requirements.

#### **3. RELEVANCE TO PORTFOLIO MEMBER**

The Portfolio Holder for Adult & Public Health has responsibility for this service.

#### **4. TYPE OF DECISION**

Non key

#### **5. DECISION MAKING ROUTE**

Adult & Public Health Services Portfolio.

#### **6. DECISIONS(S) REQUIRED**

The Portfolio Holder is asked to note the progress made and to approve the proposed Action Plan.

## **ADULT & PUBLIC HEALTH SERVICES PORTFOLIO**

Report to Portfolio Holder

**Report of:** Assistant Director Regeneration & Planning

**Subject:** SECTION 18 STANDARD FOR HEALTH AND SAFETY  
ENFORCEMENT

---

### **1. PURPOSE OF REPORT**

- 1.1 The purpose of the report is to inform the Portfolio Holder of the progress made in meeting the Council's statutory obligations under Section 18 of the Health and Safety at Work etc Act 1974 and to seek approval of an action plan to fulfil unmet requirements.

### **2. BACKGROUND**

- 2.1 Hartlepool Borough Council is designated as a Health and Safety Enforcing Authority under the Health and Safety at Work etc Act 1974 and has a statutory duty to enforce the Act in those premises allocated under the provisions of the Health and Safety (Enforcing Authority) Regulations 1998.
- 2.2 The primary purpose of the Health and Safety at Work Act 1974 is to control risks from work activities. The role of the enforcing authorities is to ensure that duty holders manage and control these risks and thus prevent harm to employees and to the public.
- 2.3 Section 18(4) of the Health and Safety at Work etc Act 1974 puts a duty on the Health and Safety Executive (HSE) and local authorities to make 'adequate arrangements' for health and safety enforcement. New Section 18 guidance was issued in 2008 requiring enforcing authorities, from 1st April 2008, to work towards compliance with the principles and standards. From 31st March 2011, compliance with the Standard is mandatory.
- 2.4 The purpose of having adequate arrangements in place is:
- to deliver high-quality investigations and enforcement work;
  - to effectively deliver a number of specific statutory duties and other obligations on behalf of the government;

- to have the right people, in the right place, at the right time, possessing the right skills, knowledge and behaviours and performing the right roles to make efficient use of the available resources in support of delivering health and safety objectives and wider community targets; and
- to be recognised as an effective and proportionate regulator.

2.5 The principles on which the Standard is based are set out in four parts:

1. To “make it happen” every Enforcing Authority shall.....
  - set out their commitment priorities and planned interventions;
  - put into place the capacity, management infrastructure, performance management and information systems required to deliver an effective service and to comply with their statutory duties;
  - operate systems to train, appoint, authorise, monitor and maintain a competent inspectorate.
2. To “do it right” every Enforcing Authority shall.....
  - use intervention, including enforcement action, in accordance with their enforcement policy and within the principles of proportionality, accountability, consistency, transparency and targeting.
3. To “work together” every Enforcing Authority shall.....
  - work within their own organisation, in partnership with other Enforcing Authorities and with other regulators and stakeholders to make best use of joint resources and to maximise their impact on local, regional and national priorities.
  - actively contribute to liaison, policy and governance arrangements at a local, regional and national level.
4. To “sell the story” every Enforcing Authority shall....
  - promote sensible risk management as:
    - i) ensuring that workers and citizens are properly protected;
    - ii) providing overall benefit to society by balancing benefits and risks, with a focus on controlling real risks – both those which arise more often and those with serious consequences;
    - iii) enabling innovation and learning, not stifling them;
    - iv) ensuring that those who create risks manage them responsibly and understand that failure to manage real risks responsibly is likely to lead to robust action; and
    - v) enabling individuals to understand that, as well as the right to protection, they also have to exercise personal responsibility.
  - Sensible risk management is not about:
    - i) creating a totally risk free society;
    - ii) generating mountains of useless paperwork;

- iii) scaring people by exaggerating or publicising trivial risks;
- iv) stopping important recreational and learning activities for individuals when the risks are managed or
- v) reducing protection of people from risks that cause real harm and suffering.

2.6 Under the Health and Safety at Work etc Act 1974, the HSE has power to audit any local authority's health and safety enforcement service. Compliance with the Standard will be monitored initially through a system based on Self-Assessment and Peer Review. In exceptional cases, the HSE has the power to take over duties of persistently under-performing councils.

2.7 The Self-Assessment and Peer Review system consists of seven steps:-

- a) Enforcing Authority self-assessment against S18 Standard using question sets to help determine level of implementation;
- b) Enforcing Authority develops an Action Plan to overcome any deficiencies or put in place elements of best practice (progress reviewed annually);
- c) Enforcing Authority records evidence of implementation where appropriate;
- d) Enforcing Authority shares its Self-Assessment, Action Plan and supporting evidence with other Enforcing Authorities within their Liaison Group;
- e) A peer review within the Liaison Group challenges the assumptions / conclusions reached by the Enforcing Authority and suggests any necessary revisions to the Action Plans;
- f) Findings of the Self-Assessment / Peer Review and progress with Action Plans are reported to local Chief Environmental Health Groups;
- g) Local Authority Unit gathers the review data and provides a report on implementation and issues for further consideration to HELA on an annual basis.

Self Assessment and Peer Review will be undertaken in full once every four years and progress on action plans reported annually.

2.8 To assist enforcing authorities HSE issued a toolbox containing guidance and criteria to be used to support the Self-Assessment and Peer Review process. By 31 March 2011 councils are expected to have:

- gone through the Self-Assessment,
- completed their Action Plan and started to deliver any necessary improvements and;
- have undertaken or planned for a peer review within their sub region.

### 3. SELF-ASSESSMENT AND PEER REVIEW

3.1 We have completed the Self-Assessment and consider ourselves broadly compliant with the S18 Standard. We have however identified a number of minor deficiencies which need to be addressed.

These are outlined below:

- Commitment, Priorities and Planned Interventions / Sensible Risk Management

While the Council operates within the spirit of sensible risk management we have not formally pledged commitment to the Strategy 'Health and Safety of Great Britain' which encompasses the principles of the Sensible Risk Management Campaign. A copy of the Strategy is included as **Appendix 1**.

- Capacity

Within the S18 Standard there is a requirement to assess whether there is sufficient capacity within the enforcing authority to undertake their statutory duties and to deliver an effective service.

Whilst we have determined that with the existing compliment of staff we have adequate capacity to discharge our duty under the Standard we are facing unprecedented budget pressures. As each years Intervention / Service Plan is drawn up an assessment will need to be made to ensure that the Authority can continue to service its workload and fulfil its requirements under the Standard including:

- a) provide the necessary protection for employees and our local community;
- b) secure the required contribution to the national strategic priorities and related targets concerning reduction of workplace injury and ill health rates;
- c) accord with the principles of the Hampton Report and Better Regulation Executive report entitled 'Improving Outcomes of Health and Safety'

- Enforcement Policy

Whilst we have an Enforcement Policy this is in need of review to reflect updated guidance and government priorities.

3.2 We have undertaken a Peer Review exercise with the other Tees Valley local authorities to compare and challenge our findings.

#### 4. ACTION PLAN

4.1 An Action Plan has been drawn up to identify actions required to address the above deficiencies and we are working towards delivering the necessary improvements. A copy of the Action Plan is included as **Appendix 2**.

The actions required are summarised below:

1. The Council should make a formal corporate commitment to improving health and safety outcomes. It can do this by pledging commitment to the HSE's strategy, 'Health and Safety of Great Britain Be Part of the Solution', which encompasses the principles of sensible risk management.

Pledging support for the Strategy will confirm the Council's commitment to the promotion and application of sensible risk management across all sectors. As an enforcing authority it is important that the Council takes a lead in pledging support for the policy. A copy of the pledge that the HSE is asking companies and organisations to sign is detailed below:

We, the undersigned:

- Agree to play our part in reducing the numbers of work-related deaths, injuries and ill-health in Great Britain.
- Call on employers to put health and safety at the heart of what they do and to take a common sense approach to health and safety.
- Commit to debunking myths around health and safety that trivialise the impact of injuries, ill health and deaths on individuals and their families.
- Recognise the importance of health and safety in difficult economic times and the dangers of complacency.
- Pledge to work with the Health and Safety Executive and its partners to Be Part of the Solution.

Consultation has been undertaken with the Council's Health, Safety & Wellbeing Manager on pledging support to the principle of sensible risk management of health and safety. This is to ensure that the Council will also be meeting its corporate obligations as an employer in respect of health and safety legislation and as part of its Health and Safety Policy. The aim is to adopt a sensible risk management approach and accepting risks exist and managing them in a sensible and proportionate manner by concentrating resources on the higher risk activities.

2. As each years Intervention / Service Plan is drawn up an assessment will need to be made to ensure that the Authority can continue to service its workload and fulfil its requirements under the Standard. A statement of commitment to provide the required capacity shall be included in future plans.
3. The service's Enforcement Policy should be reviewed and updated. Work has already commenced and once it is completed a report shall be brought to the Portfolio Holder requesting approval of the new policy.

**5. RECOMMENDATIONS**

5.1 The Portfolio Holder is requested to:

- (a) Note the new requirements placed on the Authority and the progress made in complying with the Standard and
- (b) Agree the proposed Action Plan including approving that the Council should pledge commitment to the HSE's strategy, 'Health and Safety of Great Britain Be Part of the Solution'.

Our mission is to prevent death, injury and ill health in Great Britain's workplaces and we are seeking your support – for the strategy and by becoming part of the solution.

The improvements in Great Britain's health and safety performance over the last three decades are already a collective achievement we can all take pride in – and build on. The 1974 Health and Safety at Work etc Act and its underlying principles and philosophy provide us with a legislative framework that is adaptable and remains fit for purpose today.

When the new Board of HSE formed in April 2008 we decided to take the lead in developing a new strategy, which would build on the many strengths of what we already have, but would also recognise the many changes that continue to take place around us and which present new challenges for the health and safety system as a whole. The consultation process has evinced widespread support for our approach from all stakeholders and has enabled us to fine-tune the strategy to take account of the views expressed.

There is collective agreement that:

- ∞ We need renewed momentum to improve health and safety performance.
- ∞ We need to respond to a wide range of risks – from more small businesses, from new sectors and new technologies, as well as traditional industries and long-standing risks.
- ∞ We need to find new ways of engaging workforces in all workplaces of all shapes and sizes, using the knowledge we have gained from the past that properly involved unionised safety representatives achieved better health and safety performance.

\\ We need leaders who are committed to promulgating a common-sense, practical approach to health and safety in their own organisations and throughout the supply chains they work with, motivated by the real business benefits, not exemption from regulatory scrutiny.

\\ We need to regain the value of the brand for what is real health and safety and challenge its devaluation as a synonym for unnecessary bureaucracy and an excuse for not doing things.

The strong co-regulator partnership between HSE and local authorities is integral to this strategy and to its delivery – but regulators cannot do it alone. We need everyone to play their part in delivering improved higher standards of performance in health and safety because it is **delivery** of this strategy that will count.

We will measure and report our progress, but we should be clear that we will be measuring the success of our collective efforts not just the role of the regulator.

You have told us that you support our approach, now let us work together to make this a truly shared mission and to realise the many benefits. Prevention of pain and suffering to people caused by work is the major driver for us all, but doing the right things the right way also delivers improved productivity, increased workforce commitment and enhanced reputation. In a world that is continually changing around us, the need for us all to work together to make this happen is constant.

**Foreword by Judith Hackitt CBE \\ HSE Chair**

## Resetting the direction

The Health and Safety at Work etc Act 1974 established the simple yet enduring principle that those who create risk are best placed to manage it. The Act led to the setting up of the Health and Safety Commission (HSC) and the Health and Safety Executive (HSE) and established HSE and local authorities as joint enforcers of health and safety law.

On 1 April 2008 HSC and HSE merged to form a single entity known as the Health and Safety Executive (HSE). HSE is the national regulatory body responsible for promoting the cause of better health and safety at work within Great Britain. It continues to work in close partnership with local authorities.

One of the first undertakings of the new HSE Board was to reset and reaffirm the direction of health and safety.

This document presents the Board's strategy for the health and safety system as a whole. It recognises and addresses the many stakeholders who have a role in maintaining or improving health and safety standards. Those stakeholders include:

- \\ employers and their representative bodies;
- \\ the self-employed;
- \\ workers and their representative bodies;
- \\ HSE;
- \\ local authorities;
- \\ Government, through its departments and agencies etc;
- \\ the devolved administrations and their agencies etc;
- \\ professional bodies;
- \\ voluntary and third sector organisations.

To be truly effective, health and safety has to be an everyday process supported by all as an integral part of workplace culture.

## The pressures to improve

Great Britain has one of the best health and safety records in the world. However, although the rates of death, injury and work-related ill health have declined for most of the past 35 years, the rate of decline has noticeably slowed.

Within the EU, considerable effort has been invested in raising standards and bringing consistency to health and safety legislation across all member states. Even so, Great Britain has the lowest average rate of work-related fatal injuries and only Sweden and Ireland have lower rates for non-fatal injuries resulting in the worker being absent for three or more days.

Yet, despite the previous successes, today's headline figures indicate that the combined incidence of injury and ill health in Great Britain is much the same now as it was five years ago.

Provisional figures for 2007/08 show that 229 workers were killed and 136 771 employees were seriously injured at their place of work. Similarly, during the same period, approximately 2.1 million people were suffering from an illness reputedly caused or made worse by their current or past work. The emotional toll to families, friends and communities is enormous.

Then there is the impact on the economy. Around 34 million working days were lost in 2007/08 due to the consequences of accidents at work and work-related ill health. Looking at the finances, it is estimated that the annual cost to society of work-related accidents and ill health is a staggering £20 billion (approximately 2% of GDP).

Clearly, maintaining the status quo is morally, legally and financially unacceptable. The pressure is on to better understand why aspects of Great Britain's health and safety performance have apparently stalled, and to find ways of beginning again the process of improvement.

## Everyone has a role

To bring about improvements in health and safety performance the need is for everyone to work together towards a set of common goals. For that to become a reality, each stakeholder within the health and safety system has to understand their role and become better at executing their responsibilities.

### **Employers, self-employed, manufacturers and suppliers**

The Health and Safety at Work etc Act clearly places responsibility on those who create the risk to manage it. This applies whether the risk maker is an employer, self-employed or a manufacturer or supplier of articles or substances for use at work. Whatever the corporate status, each risk maker has a range of duties that must be implemented to manage the risk.

### **Workers**

All workers have a fundamental right to work in an environment where risks to health and safety are properly controlled. The primary responsibility for this lies with the employer. However, workers have a duty to care for their own health and safety and for others who may be affected by their actions. The legislation requires that workers co-operate with employers on health and safety issues.

### **Third-party organisations**

Representative organisations are in a position to play a key role in driving health and safety improvements. Some are already doing so. For instance, the TUC actively promotes health and safety, while many trade union appointed health and safety representatives do a commendable job in the workplace. There is also a good spread of employer organisations, trade associations, consultant firms and voluntary organisations providing health and safety guidance to members and clients. Plus there are other organisations such as government departments and local authorities exerting influence throughout the supply chain by ensuring that contractors work in a safe and healthy way.

**HSE and local authorities**

HSE provides strategic direction and leads the health and safety system as a whole. In addition to inspection, investigation and enforcement, key activities include research, introducing new or revised regulations and codes of practice, alerting dutyholders to new and emerging risks as they are identified, providing information and advice, and promoting training.

Local authorities operate in partnership with HSE to ensure that dutyholders manage their workplaces with due regard to the health and safety of their workforce and those affected by their work activities. To achieve this, local authorities, as with HSE, provide advice and guidance on what the law requires, conduct inspections and investigations, and take enforcement action where appropriate.

With regard to the public, there are many regulatory bodies whose remit includes protection of the public from work activities. Local authorities also have wider responsibilities for the safety of local communities. Where appropriate, HSE and local authorities will therefore work with partner bodies to ensure that activities are co-ordinated, duplication of effort is avoided and that public safety is effectively delivered.

## Investigations and securing justice

HSE and local authorities are independent regulators. Working in partnership, their primary focus is to assist dutyholders in preventing work-related accidents and ill health. This is generally achieved through inspections and a range of proactive measures including stakeholder engagement, communications programmes and the provision of information and advice.

Investigating complaints, accidents and ill health is also an important lever for improving health and safety standards. In particular, the investigation of incidents is crucial to help determine the causes, learn and share lessons and ensure that necessary measures are in place to prevent recurrence.

Investigation also provides the basis for enforcement action to secure justice. Where appropriate, HSE or the relevant local authority will rigorously seek justice against those that put others at risk and in particular where there is a deliberate flouting of the law.

Enforcement has three main objectives: Firstly, it seeks to compel dutyholders to take immediate action to deal with the risk. Secondly, it promotes sustained compliance with the law. Thirdly, it looks to ensure that dutyholders who breach health and safety requirements, and directors or managers who fail in their responsibilities, should be held to account for their actions.

Our goal \\ To encourage strong leadership in championing the importance of, and a common-sense approach to, health and safety in the workplace.

Our goal \\ To motivate focus on the core aims of health and safety and, by doing so, to help risk makers and managers distinguish between real health and safety issues and trivial or ill-informed criticism.

## The need for strong leadership

Health and safety leadership must start at the top. Whatever the nature of the organisation, whether in the public, private or not-for-profit sector, members of the board have both collective and individual responsibility for health and safety. As such, the need is for people of board-level status to champion health and safety and be held accountable for its delivery.

Following the example of leadership at board level, leadership must also permeate throughout the management and supervisory levels and the workforce. In SMEs there should be at least one person committed to ensuring good health and safety performance.

Health and safety leadership is all about accountability. It means taking ownership of risk and accepting responsibility for managing it. A health and safety leader is the person who drives cultural change by winning the hearts and minds of directors, managers, workers and contractors. A leader fundamentally alters the corporate ethos so that health and safety becomes 'the way we do business around here'.

Importantly, good leadership maintains a focus on the real health and safety issues and distances itself from the 'jobsworth' approach and those instances where health and safety is used as a convenient excuse for not doing something.

Our goal \\ To encourage an increase in competence, which will enable greater ownership and profiling of risk, thereby promoting sensible and proportionate risk management.

## Building competence

It is important to understand that within health and safety legislation, organisations of all sizes are required to nominate at least one competent person to help them meet their duty to control the risks posed by their work activities. Larger organisations often appoint one or more members of the workforce to do this, while with SMEs the responsibility commonly rests with the owner/manager. Similarly, some organisations bring in specialist external consultants to help, and in other instances a professional body may be called upon to provide advice.

However, in practice, legislative compliance should be regarded as the minimum acceptable standard. Truly effective health and safety management requires competency across every facet of an organisation and through each level of the workforce. The need is for health and safety training to place greater emphasis on coaching so that directors, line managers and workers alike are able to determine what is sensible and reasonable. Also, it is important that the education system embeds the basic understanding of risk as a life skill so that young people joining the workforce are more risk aware.

The essence of competence is relevance to the workplace. What matters is that there is a proper focus on both the risks that occur most often and those with serious consequences. Competence is the ability for every director, manager and worker to recognise the risks in operational activities and then apply the right measures to control and manage those risks.

Our goal \\ To reinforce the promotion of worker involvement and consultation in health and safety matters throughout unionised and non-unionised workplaces of all sizes.

## Involving the workforce

Workplace research provides evidence to suggest that involving workers has a positive effect on health and safety performance. Equally, there is strong evidence that unionised workplaces and those with health and safety representatives are safer and healthier as a result.

The need is to develop a genuine management/workforce partnership based on trust, respect and co-operation. With such a partnership in place, a culture can evolve in which health and safety problems are jointly solved and in which concerns, ideas and solutions are freely shared and acted upon.

In the first instance, training managers and health and safety representatives together will establish a shared perspective on tackling health and safety issues in their organisation and complement the training they already receive separately. This, in turn, encourages the combined involvement of management and health and safety representatives in inspections, investigations and risk assessments. Ultimately, the effect of workforce involvement is that operational practices and health and safety risk management are aligned for the benefit of all and with the co-operation of everyone.

Whether unionised or not, no matter the size or scope of the organisation, worker involvement is fundamental to good health and safety performance and therefore to good business.

**Our goal \\ To specifically target key health issues and to identify and work with those bodies best placed to bring about a reduction in the incidence rate and number of cases of work-related ill health.**

**Our goal \\ To set priorities and, within those priorities, to identify which activities, their length and scale, deliver a significant reduction in the rate and number of deaths and accidents.**

## Creating healthier, safer workplaces

Central to the creation of healthier, safer workplaces is the need for all stakeholders in the health and safety system to set priorities. This applies whether the stakeholder focus is on an industry, a sector, a particular health and safety issue or an individual business or organisation.

The starting point is to create a risk profile identifying which groups of workers are most at risk and the scale and incidence of injuries or cases of ill health. Bearing in mind the evolving nature of British society, care should be taken to acknowledge differences within the workforce in terms of ethnicity and language, cultural values and gender. Having a risk profile sets the priorities for health and safety improvement, which then enables resources and expertise to be more accurately targeted to deliver those improvements.

With regard to work-related ill health, setting targets and implementing actions is complex. Some ill health is clearly work related, albeit with long latency in certain cases. However, as every employer will recognise, other causes of ill health are not solely work-related or their seriousness may be exacerbated by non-work-related factors. In order to set health priorities and establish the most effective delivery mechanisms, collaboration is required to establish who should deal with specific issues. Key among those issues is how best to manage the interface between work and the other factors that may be impacting on a person's health.

To make workplaces safer, in those sectors where injury has always run higher than average the need is to find new ways of tackling old problems. Equally, in emerging sectors and those existing sectors energised by evolving technologies, the requirement is to recognise the inherent new risks and implement appropriate methods for managing them from the beginning.

## Customising support for SMEs

Small businesses and other organisations make an important contribution to Great Britain's economic prosperity. However, they also account for a considerable number of the health and safety incidents reported each year. That is not to say that SMEs are inherently dangerous. Rather, it is the case that some SMEs conduct certain activities that carry a high level of risk.

SMEs often find goal-based health and safety management difficult to apply. Therefore, the objective for HSE, local authorities and all stakeholders involved with SMEs is to find new ways to help them understand how to comply with health and safety law in a manner proportionate to the risks posed by their work activities.

Our goal \\ To reduce the likelihood of low frequency, high impact catastrophic incidents while ensuring that Great Britain maintains its capabilities in those industries strategically important to the country's economy and social infrastructure.

## Avoiding catastrophe

Great Britain has a number of highly specialised industries providing products or services that are essential to contemporary living, such as energy for homes and workplaces and fuel to power vehicles. There is a risk though that if these industries are not properly managed they have the potential to cause harm to their workers and the public at large. Even a small failure in their health and safety regimes could have catastrophic consequences.

Strong health and safety leadership is essential to make sure that the right systems are in place, that best practice is shared and that learning is disseminated from previous incidents. While recognising the economic and social importance of hazardous industries, the critical objective is to ensure that the hazards are kept firmly in check.

## Taking a wider perspective

Health and safety does not and cannot exist in a vacuum. It is not a discrete entity and so Great Britain's health and safety priorities cannot be delivered in isolation from other issues that impact on or overlap with them.

National legislation and its implementation has been and continues to be influenced by the EU. Similarly, Britain's socio-economic make-up and cultural values have changed enormously since 1974 and so the practice of health and safety must continually evolve to accommodate diversity within the population.

From the Government's perspective, health and safety is just one part of the overall business regulation. Equally, for some years now, local authorities and many businesses have brought health and safety and other portfolios such as the environment together in terms of organisation and delivery.

The reality is that health and safety integrates with a much wider agenda aimed at protecting people from harm and thereby benefitting not just the individual but society as a whole.

This strategy seeks to continue improving the country's health and safety performance while recognising and responding to wider issues where it is appropriate to do so. As such, there is an acknowledged need for balance in managing the interfaces between health and safety and other law and also between HSE and other regulators. Crucially, regulation must be a benefit to those it seeks to protect, not a disproportionate burden on those who have to comply with it.

## Driving change for the better

The strategic goals for the health and safety of Great Britain are founded in common sense and practicality. They have one overriding aim: that is to prevent the death, injury and ill health of those at work and those affected by work activities. The strategy is not asking for or expecting the impossible. Its essence is that everyone adopts a sharper focus on the priorities and takes leadership in addressing their responsibilities.

HSE is committed to directing its energies and resources to the achievement of the strategic goals. As such, it stands alongside all the stakeholders in the health and safety system and is prepared to be held accountable for its performance.

The process of health and safety improvement began in 1974 and continued unabated until around 2003. Since then it has stalled. From now on, if all stakeholders work together with a clear vision and purpose, improvement can recommence and changes for the better can be realised.

Ultimately, the goals set out in this strategy have four clear objectives for the health and safety of Great Britain:

- \\ to reduce the number of work-related fatalities, injuries and cases of ill health;
- \\ to gain widespread commitment and recognition of what real health and safety is about;
- \\ to motivate all those in the health and safety system as to how they can contribute to an improved health and safety performance;
- \\ to ensure that those who fail in their health and safety duties are held to account.

# **ADULT AND PUBLIC HEALTH SERVICES PORTFOLIO**

Report to Portfolio Holder  
28 March 2011

**Report of:** Director of Child and Adult Services

**Subject:** LOCAL AUTISM ACTION PLAN

---

## **SUMMARY**

### **1.0 PURPOSE OF REPORT**

To update the Portfolio Holder on developments in respect of autism.

### **2.0 SUMMARY OF CONTENTS**

The report provides details on the North East Autism Consortium Regional Plan, the Tees Valley Autism Service Delivery Group Action Plan and the Local Autism Action Plan for Hartlepool.

### **3.0 RELEVANCE TO PORTFOLIO MEMBER**

The Portfolio Holder has responsibility for adult social care services, including services provided to people with autism and their families / carers.

### **4.0 TYPE OF DECISION**

Non Key: For information only

### **5.0 DECISION MAKING ROUTE**

Adult and Public Health Services Portfolio – 28 March 2011

### **6.0 DECISION(S) REQUIRED**

To note progress and approve the report

**Report of:** Director of Child & Adult Services

**Subject:** LOCAL AUTISM ACTION PLAN

---

## **1. PURPOSE OF REPORT**

- 1.1 To update the Portfolio Holder on developments in respect of autism.

## **2. BACKGROUND**

- 2.1 The Autism Act 2009 makes provision for meeting the needs of adults with autistic spectrum conditions and for connected purposes. Following agreement by both Houses on the text of the Autism Bill it received Royal Assent on 12 November 2009. The Bill is now an Act of Parliament (Law).
- 2.2 On 17 December 2010 the Department of Health published statutory guidance for local authorities and NHS organisations to support implementation of the autism strategy.

## **3. BRIEF OVERVIEW**

- 3.1 The purpose of the statutory guidance is to secure the implementation of 'Fulfilling and Rewarding Lives: The strategy for adults with autism in England' by giving guidance to local authorities, NHS bodies and NHS Foundation Trusts around training of staff, the diagnosis of autism and the leadership and planning of services.
- 3.2 This guidance will help these bodies to develop services that support and meet the locally identified needs of people with autism and their families and carers. The strategy seeks to make existing policies and public services work better for adults with autism. This guidance therefore reminds local authorities, NHS bodies and NHS Foundation Trusts of what some of the relevant policies are and their existing duties and responsibilities. It refers to existing guidance to support adults with autism, and sets out some additional guidance to help these bodies implement the strategy.
- 3.3 The guidance includes information on:-
- The provision of relevant services for the purposes of diagnosis
  - Identification of adults with such conditions
  - The assessment of the needs of adults with such conditions or relevant services

- Planning in relation to the provision of services as they move from being children to adults
- All other planning in relation to the provision of relevant services to adults with autistic spectrum conditions
- The training of staff who provide relevant services to adults with such conditions
- Local arrangements for leadership in relation to the provision of relevant services to adults with such conditions.

#### **4. AUTISM DELIVERY PLANS**

- 4.1 The North East Autism Consortium (NEAC) supports the four sub-regional Autism Service Development Groups (ASDG). Commissioners from all 12 Local Authorities and PCTs participate in the Consortium.
- 4.2 The Consortium operates as a regional advisory group for services for people with autism and aspergers, and is chaired by Ewen Weir, Director of Adult and Community Services, Newcastle City Council on behalf of the North East branch of ADASS (Association of Directors of Adult Social Services).
- 4.3 **Appendix 1** provides information on the NEAC draft regional plan
- 4.4 The Tees Valley Autism Service Delivery Group (ASDG) is chaired by Ruth Hicks (Middlesbrough Borough Council) and has representation from Local Authorities, PCTs and NHS Trusts covering Hartlepool, Middlesbrough, Redcar & Cleveland and Stockton. It also has involvement from education, housing, family members and people with autism.
- 4.5 **Appendix 2** provides information on the Tees ASDG Action Plan.
- 4.6 **Appendix 3** provides information on the Local Autism Action Plan for Hartlepool and supports the recommendations within the statutory guidance, and the Tees ASDG plan.

#### **5. RECOMENDATIONS**

- 5.1 The Portfolio Holder is asked to note progress and approve the report.

CONTACT OFFICER: Neil Harrison, Head of Service (Disabilities)

## DRAFT REGIONAL PLAN

### **Preparing our 3 year Regional Plan for Autism from March 2011**

This is the first draft for discussion at the NEAC Regional Forum on 7<sup>th</sup> December 2010. The themes have been identified as priorities at ASDG meetings and events for the wider consortium and its stakeholders, but stakeholders now have the opportunity to influence the content. The ASDG Chairs and interested parties will meet in February following the local action planning workshops to identify the milestones, the timing and the measures of success.

1. To develop the NEAC's regional advisory forum into a regional partnership arrangement which will support the implementation the regional and local action plans for autism.

#### **Ensure buy in from ADASS**

We will need to make sure that parents/carers are able to share their ideas, experiences and issues with Local Planning groups, sub regional groups and the NEAC's regional partnership.

We will need to explore a variety of approaches which will suit young people and adults with autism and Asperger Syndrome to learn about the work of the consortium and to influence the local planning of services.

We will need to set up a regional Autism Provider Forum which nominates people to link into the work of the NEAC.

Monitor and review the implementation of the regional strategy against Fulfilling and Rewarding Lives and the DH best practice guidance.

We will review our regional plan for autism every year, and the NEAC will work with the Local authority lead officers for autism to deliver their local action plans.

2. To support local authorities to focus on the following requirements within the Statutory Guidance
  - Improving the transition process for young people aged 14+ and people in transition into work/adult or community services after school or college.
  - Bringing together key partners to design and deliver a diagnostic service for our region
  - Improving the collection of data about what local people with autism need from the NHS and from local authorities in order to live both independently and safely.
  - Support local authorities to add to the info and advice available for families on their websites.

3. To support more people with ASCs and their families to feel the benefits of having a personal budget.
  - to support families to appreciate what is entailed and the benefits to expect
  - Need to review the assessment process to make it more autism specific
  - work with social care providers on an equal basis to create more individualistic care and support services to meet the needs of local people with autism
  - Collect evidence about the real improvements and practical safeguards in peoples' lives once they have their own budget.
  - Share the finding of the Individual Service Fund pilot study around the region.
  - Engage with social care providers, agencies and the VCS in order to plan and deliver local support services.
  - Establish links with ULOs which support Budget holders and train Personal Assistants.
4. To adopt the NEAC commissioning framework in every local authority which focuses on modern commissioning approaches, improved outcome and financial savings.
5. Involve additional parents in the work of the consortium and leisure LD PB Health and Well Being Boards, DEA's Criminal Justice system, housing providers.
6. Housing education training and employment.
7. To support initiatives which help more people with autism into work via specialist disability employment programmes and the work of ULOs and other providers in our region
8. Support social care provider agencies to give the people they support the right support into employment.
9. To challenge services and commissioning practices which are not appropriate for the individual and don't improve the quality of their lives and are not a justifiable use of resources.
  - Focus on out of area placements
  - Accept that all models of support have their merits as part of the choices offered to individuals and their families.
  - Focus on preventative service and support networks
10. To coordinate the delivery of training in autism for our region

- Involvement in the DH work with the NAS, Skills for Care and Skills for Health which will produce guidance for employers, managers and staff within the Health and Social Care workforces.
11. Supporting local authorities to identify priority groups, and aligning plans with personalisation, re-ablement and safe-guarding and prevention.
  12. To champion the implantation of the autism strategy, share achievements and undertake project work with our partners to improve the quality of life for individuals and their families who live in our region.
  13. Provide practical support to the lead officers for autism in their role to oversee the implementation of their local action plans for autism.

## Teeswide Autism Action Plan – APPENDIX 2

### Teeswide Autism Action Plan for 2011 (to be reviewed Jan 2012)

Local Authorities: **Middlesbrough, Hartlepool, Redcar & Cleveland, Stockton**Lead Commissioners/Senior Managers: **Ruth Hicks, Neil Harrison, Ken McGladrie, Melanie Smiles**

|   | What are our shared priorities for this year?         | What difference will it make to individuals with ASCs and their families?             | What are the main tasks involved in these priorities?   | Who will lead?   | Who needs to be involved? | How long will it take? | Are we making enough progress?<br>⊗ ☹ ☺ |

**Report to Portfolio Holder**

28 March 2011

**Report of:** Director of Child and Adult Services

**Subject:** ENABLEMENT AND SUPPORT SERVICES FOR  
PEOPLE WITH FORENSIC BACKGROUNDS

---

**SUMMARY**

**1. PURPOSE OF REPORT**

To inform the Portfolio Holder for Adult and Public Health Services of the intention to enter into a framework agreement for enablement and support services for people with forensic backgrounds.

**2. SUMMARY OF CONTENTS**

The report provides information on the proposed framework agreement to support people with forensic backgrounds

**3. RELEVANCE TO PORTFOLIO MEMBER**

The Portfolio holder is responsible for adult social care services, which includes support to people with forensic backgrounds.

**4. TYPE OF DECISION**

Non Key – for information only

**5. DECISION MAKING ROUTE**

Decision by the Director of Child and Adult Services – 28 March 2011

**6. DECISION REQUIRED**

No decision required. The Portfolio Holder is asked to note the content of the report and the arrangements as indicated

**Report of:** Director of Child and Adult Services

**Subject:** ENABLEMENT AND SUPPORT SERVICES FOR  
PEOPLE WITH FORENSIC BACKGROUNDS

---

**1. PURPOSE OF REPORT**

- 1.1 To inform the Portfolio Holder for Adult and Public Health Services of the intention to enter into a framework agreement for enablement and support services for people with forensic backgrounds.

**2. BACKGROUND**

- 2.1 The Tees Integrated Commissioning Group identified a shortage of suitably trained and qualified providers within the region who could meet the support needs of people with learning disabilities and a history of offending.
- 2.2 Middlesbrough Council, with the support of Hartlepool, Stockton, and Redcar & Cleveland undertook a planning event in July 2009 aimed at developing the learning disability provider market across Tees.
- 2.3 With the support of Paradigm and with funding from the DH Valuing People Support Team, providers were given the opportunity to look at developing a care and support service to support people returning to their localities following a hospital admission.
- 2.4 Positive Support in Tees (PST) were supported as a newly formed Community Interest Company and have been awarded a framework agreement. PST will receive support through Paradigm and the Department of Health Valuing People Support Team to develop skills competencies and knowledge to ensure the outcomes of individuals with a forensic history can be met.

**3. UNDERSTANDING THE FORENSIC PATHWAY**

- 3.1 The learning disability forensic pathway functions within the range of learning disability as defined within ICD-10 (the International Classification of Disease; Mental and Behavioural Disorders)
- 3.2 The pathway supports adults from age 19 who may be subject to a legal order as a consequence of their offending behaviour. They may be engaging in behaviours that have been sufficiently severe as to be putting the safety of others at risk and as a result required police intervention.
- 3.3 In patient treatment and assessment pathways are delivered by Tees Esk and Wear Valley NHS Foundation Trust.

- 3.4 Forensic case management is supported via a Tees Agreement and a service is currently provided via Middlesbrough Borough Council with contributions from Hartlepool, Stockton and Redcar & Cleveland.
- 3.5 Treatment entails the application of recognised, definable, developmentally based therapeutic interventions aimed at an identified deficit, disability or area of the person's psychopathology. It is an active planned process with defined goals and outcome measurement.
- 3.6 Upon completion of the defined treatment the person is then assessed before a panel of experts to determine if appropriate to discharge.
- 3.7 Individual service design using person centred approaches are developed as part of the discharge process; it is at this stage when individuals will engage with respective providers.

#### **4.0 CURRENT POSITION**

- 4.1 At present there are 11 adults with learning disabilities from Hartlepool who are supported through the forensic pathway. It is estimated that 3 people will be ready for discharge over the next 12 months.
- 4.2 PST will work in partnership with Hartlepool, Stockton, Redcar & Cleveland and Middlesbrough Councils and will have close links with the Tees Forensic Assessment Unit.

#### **5. APPROVAL OF FRAMEWORK AGREEMENT**

- 5.1 The Director of Child and Adult Services has delegated authority within the HBC Constitution to make arrangements for social care services. In making such arrangements the Child and Adult Services Department is exempt from the Contract Procedure Rules where such contracts are in relation to services and appropriate provision for vulnerable people.
- 5.2 A proposal to establish a framework agreement with Positive Support in Tees to provide support for people with learning disabilities and forensic backgrounds was approved by the Director of Child and Adult Services on 14 February 2011.

#### **6. RECOMMENDATION**

- 6.1 That the Portfolio Holder notes the contents of the report and the arrangements as indicated.

#### **7. CONTACT OFFICER**

- 7.1 Neil Harrison, Head of Service (Disabilities)

# **ADULT AND PUBLIC HEALTH SERVICES PORTFOLIO**

Report to Portfolio Holder  
28 March 2011

**Report of:** Director of Child and Adult Services

**Subject:** LEARNING DISABILITY PERFORMANCE AND  
HEALTH ASSESSMENT FRAMEWORK

---

## **SUMMARY**

### **1.0 PURPOSE OF REPORT**

To update the Portfolio Holder on the results of the third annual Learning Disability Performance and Health Assessment Framework

### **2.0 SUMMARY OF CONTENTS**

The report provides an update on the annual self assessment undertaken with the support of the Hartlepool Learning Disability Partnership Board.

### **3.0 RELEVANCE TO PORTFOLIO MEMBER**

The Portfolio Holder is responsible for adult social care services including those provided to adults with learning disabilities.

### **4.0 TYPE OF DECISION**

Non Key: for information

### **5.0 DECISION MAKING ROUTE**

Adult and Public Health Services Portfolio – 28 March 2011

### **6.0 DECISION(S) REQUIRED**

To note progress and approve action plan updates

**Report of:** Director of Child & Adult Services

**Subject:** LEARNING DISABILITY PERFORMANCE AND HEALTH ASSESSMENT FRAMEWORK

---

**1. PURPOSE OF REPORT**

- 1.1 To update the Portfolio Holder on the results of the third annual Learning Disability Performance and Health Assessment Framework.

**2. BACKGROUND**

- 2.1 An independent inquiry into access to healthcare for people with learning disabilities was established under Sir Jonathan Michael's leadership in May 2007. The inquiry found convincing evidence that people with learning disabilities have higher levels of unmet need and receive less effective treatment.
- 2.2 Valuing People Now (a three year strategy for people with learning disabilities) has identified that a key priority for delivery is to secure access to, and improvements in healthcare.
- 2.3 A North East regional programme of work was launched in April 2008 with the aim of ensuring people with a learning disability are as healthy as possible and have equality of access to health care.
- 2.4 The leadership group is chaired by Stephen Singleton, North East Director of Public Health and Medical Director for the Strategic Health Authority (SHA).

**3. PROGRESS**

- 3.1 A performance and self assessment framework has been agreed, which is referred to locally as the Annual Health Check. The health check includes a strong focus on access to mainstream health improvement and health service provision including the commissioning of safe high quality specialist health learning disability services.
- 3.2 In October 2008 'Inclusion North' <sup>1</sup> supported the Hartlepool Learning Disability Partnership Board to complete its first Annual Health Check.

---

<sup>1</sup> Inclusion North works in Yorkshire, Humber and the North East to promote Inclusion for people with learning disabilities, their families and carers.

- 3.3 Progress and findings were submitted to the North East SHA and a regional picture was formed.
- 3.4 During 2010 the Health Sub Group of the Learning Disability Partnership Board has monitored progress and information is then collated through the Council's performance management system Covalent (**Appendix 1**).
- 3.5 In addition a separate action plan has been developed to support the key challenges addressed in the Michael's report, Six Lives report and the recently published Raising Our Sights recommendations (**Appendix 2**).
- 3.6 An updated Annual Health Check has been submitted to the SHA, and will evidence progress against 4 key areas (**Appendix 3**).

#### **4. RECOMMENDATIONS**

- 4.1 The Portfolio Holder is asked to note progress and approve action plan updates.

CONTACT OFFICER: Neil Harrison Head of Service (Disabilities)

## Health Check Assessment Plan (APPENDIX 1)

## APPENDIX 3

|  |  |   |  |    |  |  |
|--|--|---|--|----|--|--|
|  | challenge.   |   |  |    |  |  |
| 4.9 New Horizons for mental health is equally and equitably applied to people with learning disabilities who require psychiatric services  | Work continues with the support of the Strategic Commissioner – mental Health Contract with TEVV NHS Trust outlines requirements to ensure equality of access to Mental health services for people with a learning disability  | Support from local specialist LD health care providers at partnership board.  |  | ☹️ |  | Implement recommendations from green-light review      |
| 4.10 Each Partnership Board has a learning disabilities workforce development Plan in place which includes reference to the future training and development of people working in learning disability services, in both specialist and mainstream health care areas | The Learning Disability Partnership Board as part of its Big Plan highlights learning disability awareness training. The Visioning event on 30 <sup>th</sup> September still identifies this as being a priority for not only direct learning disability providers but for the wider community. This is mirrored in the AHDC workforce plan to agree that all providers of children's service meet minimum standards of having basic learning disability awareness | Work developed with Children's department (HBC) on agreed workforce requirements, support to further extend this work to include Adults       |  | ☹️ |  | Support the implementation of the AHDC recommendations |
| 4.11 PCTs and their partners are working with local and regional Offender health teams to ensure that people with learning disabilities in prison have access to a full range of healthcare – in line with legislation, policy and best practice                   | Piece of work has been undertaken with young offenders remand centre to look at needs of young people. Commissioners in Hartlepool link closely with Specialist in patient and community Forensic teams to ensure the health needs of people with learning disabilities are being met  | Successful Future Jobs Fund bid to be implemented 2010/11. Partnership with HMP Kirklevington, HCFE and HBC to support people into employment |  | ☹️ |  | Support further development of Waverley Terrace        |

**Some more questions about how this self assessment process is reported back to the different organisations who contribute to it – and about the extent to which people are really involved and included in all the work.**

**Name of your local area: HARTLEPOOL**

1. Can you please describe the different meetings and activities that took place to bring together all the information in this feedback form? (Can you include reference to Getting Ready Meetings and to the Big Health Check up Day itself?) Please also include some information about who came and how many people were involved.
  - Visioning event held with 100 people in attendance including Health, Housing, Education, People using services, Carers and VP Lead
  - Special meeting of the partnership board, using e-voting system on key points prior to validation with commissioners.
  - Health action sub group meetings throughout the year, including a meeting for planning and submitting SAF

### 3.3 APPENDIX 3

2. This question is about making sure everyone in the Partnership Board and in other local groups (e.g. carers groups) are aware of this annual process and know how they can get involved. For example, did you have an initial presentation at the Partnership Board giving the background to the Health Check Up? Were presentations made to other groups? Please describe below what you did.

- Initial discussion at Health sub group of the partnership board (Carers present) included 2009/10 priorities
- Information presented on last years self assessment for verification at LD Partnership Board (carers present)
- Sign off at LDPB, Adult & Public Health Portfolio, PCT & Governance Board, Health and Wellbeing Partnership (LSP)
- Pre-meeting with DISC (self advocates) to support PWLD prior to visioning event (PWLD)
- Visioning event held with 100 people in attendance including Health, Housing, Education, People using services, Carers and VP Lead
- Special meeting of the partnership board, using e-voting system on key points prior to validation with commissioners.

3. This is a question about how statutory and other organisations in your local area contribute to and follow progress on your Health Agenda. Please give information here about the range of Boards, Groups and organisations who are 'briefed' about progress on the self assessment and its contents: who are they and how often do they request or receive reports?

- Sign off at LDPB, Adult & Public Health Portfolio, PCT & Governance Board, Health and Wellbeing Partnership (LSP)
- Reports are presented to LDPB prior to submission to SHA, following feedback from SHA the report goes to the LSP and its subsidiary groups as listed above

4. This is a question for carers and self advocates – did you feel enough people had a chance to join in the work and the Big Health Check this year? If you think it could get better, what kind of things need to happen to make sure more people get involved next year? (See reference 5)

- The LDPB is having difficulty in supporting the increasing demand on its time, on average 50% of the LDPB's agenda is on supporting consultation on regional /national issues. The Board have commented on this previously and find not enough pressure is being placed on Health services directly. In some cases the LDPB feel it is unable to affect change in NHS organisations.

5. We would like to have a Regional overview about what all statutory organisations have done in response to the Ombudsman's Report '6 Lives'. Please summarise below the main things your local organisations have done (e.g. Hull developed an easy read booklet about '6 Lives'), and in particular, how your organisations are reporting this activity to their Boards/Cabinets and to local partnership boards.

- An initial report was presented to PCT & Adult Management Board (PCT / HBC) with a follow up report Feb 2010.
- Recommendations are included on the Local Authorities performance management system (Covalent) and quarterly reports are produced

- as part of the Council's Business planning process.
- A copy of the report is included as evidence. **(see Reference 21)**

# **ADULT AND PUBLIC HEALTH SERVICES PORTFOLIO**

Report to Portfolio Holder  
28 March 2011

**Report of:** Director of Child and Adult Services

**Subject:** BRIEFING ON “NO HEALTH WITHOUT MENTAL HEALTH” – THE NEW STRATEGY FOR MENTAL HEALTH IN ENGLAND

---

## **SUMMARY**

### **1. PURPOSE OF REPORT**

- 1.1 On 2 February 2011 the Government published No Health without mental health, its cross-government, all-age strategy for mental health in England. The vision sets out to improve outcomes for people who use mental health services and to promote positive health and wellbeing amongst the whole population.

This briefing summarises the strategy's six objectives and the outcomes that will measure progress against them.

### **2. SUMMARY OF CONTENTS**

- 2.1 The strategy sets out six overarching objectives, aimed at improving the mental health and wellbeing of the whole population and improving outcomes for people who use services:

1. More people will have good mental health.
2. More people with mental health problems will recover
3. More people with mental health problems will have good physical health.
4. More people will have a positive experience of care and support.
5. Fewer people will suffer avoidable harm.
6. Fewer people will experience stigma and discrimination.

- 2.2 The new strategy should be viewed within a context of wider reforms to the NHS and public services:

- Equity and Excellent : Liberating the NHS : vision for the NHS
- Healthy lives, healthy people : vision for public health

- A Vision for social care : capable communities and active citizens : The future direction for adult social care.
- 2.3 Supporting outcomes frameworks have been developed alongside each of these strategies. See appendix 1
- 2.4 The strategy stresses the Government's expectation that there will be "parity of esteem" between physical and mental health services and emphasizes the interconnections between mental health, housing, employment and the criminal justice system.
- 2.5 The strategy is not intended to be directive. Local services are free to innovate and draw upon evidence of what works, including using National Institute of Clinical Evidence (NICE) quality standards, to develop services that meet local need.
- 2.6 Improving quality and efficiency will be driven by good information available to people who have greater choice and control over their treatments and support. At a local level the new statutory Health and Wellbeing Boards will bring together key partners to ensure services are effectively integrated.
- 2.7 During 2011/12 the Government will establish a Mental Health Strategy Ministerial Advisory Group to identify further actions to deliver the strategy.
- 2.8 £400 million will be committed over four years to expand the improved Access to Psychological Therapies (IAPT) programme to three new groups of people; children and young people; people with long term conditions; and people with severe mental illness. The money is not ring fenced and must be found from existing budgets. Expanding the IAPT service makes economic sense as highlighted in a report by The King's Fund and Centre for Mental Health. Improving psychological support for people with long term conditions and dealing more effectively with childhood mental health problems can give a return on investment which justifies the expenditure in financial terms alone.
- 2.9 A number of accompanying documents have been published alongside the strategy:
- No Health without mental health : delivering better mental health outcomes for people of all ages (evidence-based interventions)
  - Talking therapies : a four year plan of action (IAPT roll-out)
  - No Health without mental health : the economic case for improving efficiency and quality in mental health.
- 2.10 The new strategy presents mental health as everybody's business with three specific commitments to:
- Improve the health and wellbeing of the population

- Keep people well
- Ensure that more people with mental health problems regain a good quality of life as quickly as possible.

2.11 This is an ambitious strategy that acknowledges much work is needed if the vision is to become a reality. The objectives will not be achieved unless all relevant organisations are sufficiently held to account for delivering them.

**3. RELEVANCE TO PORTFOLIO MEMBER**

---

## **1. PURPOSE OF REPORT**

- 1.1 This report summarises the new strategy's six objectives and describes how progress will be measured against the outcome framework for the NHS, Adult Social Care and Public Health.

## **2. BACKGROUND**

- 2.1 Mental ill health represents up to 23% of the total burden of ill health in the UK – the largest single cause of disability. Nearly 11% of England's annual secondary care budget is spent on mental health. Estimates have suggested that the cost of treating mental ill health could double over the next twenty years. More than £2 billion is spent annually on social care for people with mental health problems. Estimates suggest that the cost of mental health problems is £105 billion of which around £30 billion is work related. 43% of the 2.6 million people on long-term health related benefits have a mental health or behavioural disorder as their primary condition.
2. The quality of mental health care has improved significantly in recent years; the development of community based services, the integration of health and social care, fewer people needing inpatient care and the number of inpatients committing suicide has reduced. The new strategy places an emphasis on prevention, early intervention, localism and people/communities taking more responsibility for their own wellbeing. Mental health is given parity with physical health and the focus is on outcomes.

Alongside the new mental health strategy the Department of Health (DoH) has published three key policy documents:

- Equity and Excellence: Liberating the NHS
- Healthy Lives, Healthy People: the Public Health Strategy
- A Vision for Adult Social Care: Capable Communities and Active Citizens.

Improving mental health outcomes are central to achieving the outcomes in all three frameworks. The six objectives laid out in the new mental health strategy are intended to be fully reflected in these

three frameworks' outcomes that hold the NHS, Public Health and Social Care accountable for the results they achieve. The objectives will also need to be included in the commissioning outcomes framework to be developed for GP consortia and any outcomes' measures used to monitor contracts locally.

- 2.3 The mental health strategy is a cross-government strategy for people of all ages and reflects an urgent need for co-ordinated action, starting from the earliest years in life, that will improve the mental health and wellbeing of the population year on year and the life chances and recovery rates of people who experience mental health problems.

### 3. KEY NATIONAL COMMITMENTS

- 3.1 The new strategy includes commitments to:

- Agree and use a new national measure for wellbeing.
- Challenge stigma (supporting the Time to Change programme)
- Invest around £400 million over four years to roll-out the IAPT programme to all who need it and expand this provision for children and young people, older people/carers, people with long term conditions and those with severe mental illness.
- Improve services for people within the criminal justice system.
- Improve services for Service and ex-Service personnel.
- Launch a set of 'recovery' pilots.
- Publish by April 2011 a series of evidence reviews on improving public mental health.
- Work with the Royal College of General Practitioners, the Association of Directors of Adult Social Services (ADASS) and the Royal College of Psychiatrists to agree advice and support for GP consortia to commission effective mental health services that are accessible to all.
- Ensure close working between Department of Health and Department of Works and Pensions that supports mental health service providers to help people to enter and return to work.
- Publish a new cross-government suicide prevention strategy in 2011.

### 4. SHARED OBJECTIVES

- 4.1 The strategy sets out six overarching objectives within a cross-government approach:

#### 1. More people will have good mental health

To achieve this, action will be needed to improve the mental wellbeing of individuals, families and the population in general. Work must continue to reduce the number of suicides. Public

Health England will assume responsibility for raising awareness of mental health and wellbeing.

**2. More people with mental health will recover**

To achieve this, action will focus on helping people to recover their independence as much as possible, manage their own lives, have improved chances in education, employment and a stable place to live as well as using personal budgets to promote their choice and control.

**3. More people with mental health problems will have good physical health**

To achieve this, action will focus on improving the physical health of people who have mental ill health and improving the mental health of people who have physical ill health.

**4. More people will have a positive experience of care and support**

To achieve this, action will be needed to offer access to timely, evidence-based interventions in the least restrictive environment and should ensure people's human rights are protected. An area highlighted for improvement is transitions between services, ie, children and young people moving to adult mental health services.

**5. Fewer people will suffer avoidable harm**

To achieve this, action will focus on providing high quality, safe services. This will include fewer people suffering avoidable harm from the care and support they receive, fewer people harming themselves or others and more progress being made on safeguarding children and vulnerable adults.

**6. Fewer people will experience stigma and discrimination**

To achieve this, action will be needed to improve public understanding of mental health resulting in a lessening of negative attitudes and behaviours to people with mental health provisions.

**5. MEASURING OUTCOMES**

- 5.1 Support must be built around outcomes that matter to people who use mental health services to enable them to live the lives they want to live, including good relationships, purpose, education, housing and employment.

- 5.2 Progress against the objectives above will be measured through indicators contained within the outcomes frameworks relating to the NHS, Public Health and Adult Social Care Strategies. *Many of the mechanisms by which progress on the mental health strategy will be measured are still being developed.*

**Appendix 1** sets out the domains from the three strategies' outcomes frameworks to demonstrate how the mental health strategy objectives link with them and illustrating that there is "no health without mental health".

## 6. QUALITY STANDARDS

- 6.1 The strategy outlines where NICE is developing relevant quality standards. These are intended to define what high quality care looks like for a particular care pathway or service. They will act as a bridge between the outcomes and the processes and structures that are needed to effect delivery. The commissioning function for quality standards will transfer to the NHS Commissioning Board (subject to the successful passage of the Health and Social Care Bill). The following quality standards are currently in development:

- drug use disorders in over 16's
- schizophrenia
- bi-polar disorders in adults and children
- alcohol dependence
- depression in adults
- post natal care
- drug use disorders
- dementia
- patient experience in adult mental health care
- safe prescribing
- falls in a care setting
- nutrition in hospital.

## 7. IMPLEMENTATION

- 7.1 The Cabinet Sub-committee on public health will oversee the implementation of the strategy.
- 7.2 The Government will also establish a Mental Health Strategy Ministerial Advisory Group of key stakeholders, including people with mental health problems and carers, during 2011 and 2012 while the NHS Commissioning Board and Public Health England are being established. This group will identify actions, in the transitional period, to deliver the strategy.

- 7.3 The strategy also confirms that mental health will move to a Payment By Results (PbR) system of payment. Paying for mental health services in the same way as physical health will help guard against the disadvantages of being paid on a block contract basis. Integrating social care within a PbR framework remains a challenge and adequate resources will be required to develop and implement this system effectively.
- 7.4 £400 million will be committed over four years to expand the IAPT programme. This money is not ring fenced and must be found from existing budgets. Expanding the IAPT service makes economic sense as highlighted in a report by the King's Fund and Centre for Mental Health. Improving psychological support for people with long term conditions and dealing more effectively with childhood mental health problems can give a return on investment which justifies the expenditure in financial terms alone.
- 7.5 The new strategy presents mental health as everybody's business with three specific commitments to:
- improve the health and wellbeing of the population
  - keep people well
  - ensure that more people with mental health problems regain a good quality of life as quickly as possible.
- 7.6 The strategy is not intended to be directive. Local services are free to innovate and draw upon evidence of what works. Improving quality and efficiency will be driven by good information available to people who will have greater choice and control over their treatments and support.

At a local level the new Health and Wellbeing Boards will bring together key partners to ensure services are effectively integrated to deliver the cross-cutting strategy.

## **8. FINANCIAL IMPLICATIONS**

- 8.1 On the launch of the Strategy the Government said that "central to these plans is an additional investment of around £400 million to improve access to modern, evidence-based psychological therapies over the next four years". Final spend is subject to local decision-making; it is not ring-fenced. Over the next spending review period the NHS spending settlement will be flat. Delivering the extra investment required to deliver improved access to IAPT will, therefore, require commissioners and providers to work together to make savings elsewhere.

**9. RECOMMENDATIONS**

- 9.1 This is an ambitious strategy that acknowledges much work is needed if the vision contained in this strategy is to become a reality. The objectives will not be achieved unless all relevant organisations are sufficiently held to account for delivering them.

## **OUTCOMES FRAMEWORKS: LINKAGES TO MENTAL HEALTH**

### **1. THE NHS OUTCOMES FRAMEWORK 2011/12**

#### **DOMAIN 1: Preventing people from dying prematurely**

- Under 75 mortality rate in people with serious mental illness

#### **DOMAIN 2: enhancing quality of life for people with long term conditions**

- Employment for people with mental illness
- Health related quality of life for carers

#### **DOMAIN 3: Helping people recover from ill health or following injury**

- Emergency re-admissions within 25 days of discharge from hospital

#### **DOMAIN 4: Ensuring people have a positive experience of care**

- Patient experience of community mental health services

#### **DOMAIN 5: Keeping people in a safe environment and protecting them from avoidable harm**

- Severity of harm and patient safety incident reporting
- Number of similar incidents

### **2. ADULT SOCIAL CARE OUTCOMES FRAMEWORK**

#### **DOMAIN 1: Promoting personalisation and enhancing quality of life**

- Adults with secondary mental health needs in employment
- Proportion of people using social care who receive a personal budget

#### **DOMAIN 2: Preventing deterioration, delaying dependency and supporting recovery**

- Emergency re-admissions within 28 days of discharge from hospital
- Admissions to residential care per 1000 population
- Proportion of older people still at home 91 days following discharge from hospital into reablement services
- Emergency bed days associated with two or more acute hospital admissions for over 75's
- Delayed transfers of care
- Proportion of council spend on residential care

#### **DOMAIN 3: Ensuring a positive experience of care**

- Overall satisfaction with adult social care services

- Proportion of carers who report that they have been consulted about the person they care for

**DOMAIN 4: Protecting from avoidable harm and caring in a safe environment**

- Proportion of people using social care who feel safe
- Proportion of adults using secondary mental health services in settled accommodation.

**3. PUBLIC HEALTH OUTCOMES FRAMEWORK**

**DOMAIN 1: Health protection**

- Interagency plans for response to public incidents

**DOMAIN 2: Tackling the wider determinants of ill health**

- Proportion of people with mental illness in settled accommodation
- Proportion of people with mental illness in employment
- Incidents of domestic violence
- Statutory homeless households/housing overcrowding rates
- Fuel poverty and child poverty
- Rates of violent crime
- Social Connectedness

**DOMAIN 3: Healthy lifestyles and healthy choices**

- Smoking prevalence in adults
- Rate of hospital admissions as a result of self-harm
- Rate of hospital admissions per 100,000 for alcohol related harm
- Number leaving drug treatment free of drug dependence
- Percentage of adults meeting guidelines for physical activity (5 x 30 mins per week)
- Hospital admissions caused by deliberate and unintentional injuries to children and young people
- Self-reported well being

**DOMAIN 4: Prevention of ill health**

- Work sickness absence rate
- Rates of hospital admissions as a result of self-harm
- Smoking rates of people with serious mental illness
- Emergency readmissions within 28 days of discharge
- Health related quality of life for older people

**DOMAIN 5: Healthy life expectancy and preventable mortality**

- Suicide rate
- Mortality rates in people with serious mental illness
