

## **Tees Valley Joint Health Scrutiny Committee**

**Date:** Monday 2 September 2019

**Time:** 10.00 am

**Venue:** Council Chamber, Hartlepool Civic Centre, Victoria Road,  
Hartlepool TS24 8AY

Membership: -

Darlington BC: Councillors W Newall, I Bell and J Clarke

Hartlepool BC: Councillors G Hall, B Harrison and B Loynes.

Middlesbrough BC: Councillors A Hellaoui, J McTigue and E Polano.

Redcar and Cleveland BC: Councillors D Reese, N Cooney and S Smith.

Stockton-on-Tees BC: Councillors E Cunningham, C Gamble and L Hall.

### **Agenda**

1. Apologies for Absence
2. Declarations of Interest
3. Minutes of the meeting of 17<sup>th</sup> June 2019
4. Presentation - South Tees Hospitals NHS Foundation Trust – CQC  
Inspection Report Update – *South Tees Hospitals NHS Foundation Trust  
and Hartlepool and Stockton on Tees Clinical Commissioning Group*
5. Presentation and Report - Teesside Rehabilitation Services Developments  
– *Tees, Esk and Wear Valley NHS Foundation Trust*
6. Presentation – Care Quality Commission Inspection Results – West Lane  
Hospital – *Tees, Esk and Wear Valley NHS Foundation Trust*
7. Presentation - Respite and Short Breaks Update/Monitoring – *North of  
England Commissioning Support Unit/Tees, Esk and Wear Valley NHS  
Foundation Trust*

8. Verbal Update - Recommissioning of Improving Access to Psychological Therapies (IAPT) Services – Contract Award – *County Durham and the Tees Valley Commissioning Groups*
9. Update - Direct Access to Hearing Services – Contract Award – NHS Hartlepool and Stockton on Tees CCG and NHS Darlington CCG – *Hartlepool and Stockton on Tees NHS CCG and Darlington NHS CCG*
10. Local and Regional Health Scrutiny Work Programmes – *Statutory Scrutiny Manager*
11. Any urgent items which in the opinion of the Chair can be considered.

For information: Next meeting on 13 December 2019 at the Civic Centre, Hartlepool.

# **TEES VALLEY JOINT HEALTH SCRUTINY COMMITTEE**

## **MINUTES**

17 JUNE 2019

The meeting commenced at 10.00 am in the Civic Centre, Hartlepool

### **Present:**

Hartlepool Borough Council: Councillors G Hall and B Harrison.  
Redcar and Cleveland Borough Council: Councillor S Smith.  
Stockton-On-Tees Borough Council: Councillors E Cunningham and  
C Gamble.

Officers: Peter Mennear and Judy Trainer, SBC  
Caroline Bradey, MBC  
Joan Stevens, HBC Statutory Scrutiny Manager  
David Cosgrove, HBC Democratic Services Team

### **1. Appointment for Chair for 2019/20 Municipal Year**

Councillor G Hall, Hartlepool Borough Council, was appointed Chair for the ensuing year.

**Councillor Hall in the Chair.**

### **2. Appointment for Vice-Chair for 2019/20 Municipal Year**

Councillor N Cooney, Redcar and Cleveland Borough Council, was appointed Vice-Chair for the ensuing year.

### **3. Apologies for Absence**

Darlington Borough Council: Councillors W Newall.  
Hartlepool Borough Council: Councillor B Loynes.  
Middlesbrough Borough Council: Councillors A Hellaoui, J McTigue and  
E Polano.  
Redcar and Cleveland Borough Council: Councillors D Reese and  
N Cooney.  
Stockton-On-Tees Borough Council: Councillor L Hall.

#### **4. Declarations of Interest**

None.

#### **5. Minutes of the meeting held on 11 March 2019**

Confirmed.

#### **6. Protocol for the Tees Valley Joint Health Scrutiny Committee**

The Joint Committee was presented with the protocol which governed the working of the Joint Committee and provided a framework for the Joint Committee's work.

##### **Decision**

That the protocol be noted.

#### **7. Work Programme / Meeting Timetable 2019/20**

The Joint Committee was presented with an outline work programme for the ensuing year which drew on the previous work programme of the Joint Committee covering ongoing issues and investigations outstanding from the previous municipal year. A proposed schedule of meetings was set out with an indicative list of items that would, at this time, come forward for each of the meetings.

Members suggested that the following items should also come forward during the year to the Joint Committee: -

- An update on Respite Breaks in the Tees Valley and any response to the referral to the Secretary of State by Middlesbrough and Redcar and Cleveland Borough Councils.
- An update on breast cancer screening services and any response to the proposed referral to the Secretary of State by Middlesbrough Borough Council.

##### **Decision**

1. That the programme of meetings (as set out below) be approved.  
2 September 2019  
13 December 2019  
13 March 2020

All meetings commencing at 10.00 am to be held at the Civic Centre, Hartlepool.

2. That the schedule of work programme items set out in the report be approved together with the addition of –  
An update on Respite Breaks in the Tees Valley and any response to the referral to the Secretary of State by Middlesbrough and Redcar and Cleveland Borough Councils.  
An update on breast cancer screening services and any response to the referral to the Secretary of State by Middlesbrough Borough Council.

## **8. Any Other Items which the Chairman Considers are Urgent**

None.

Members noted that the next meeting of the Joint Committee would be held on 2 September commencing at 10.00 am at the Civic Centre, Hartlepool.

The meeting concluded at 10.30 am

CHAIR

# **TEES VALLEY JOINT HEALTH SCRUTINY COMMITTEE**

2 September 2019

**Report of: Tees, Esk and Wear Valley's NHS Foundation Trust**

**Subject: Teesside Rehabilitation Services Developments**

---

## **1. PURPOSE OF REPORT**

1.1 The report aims to provide the overview and scrutiny committee with an update on the current position of rehabilitation services in Teesside and the proposed future state. It will provide an overview of the national context, Trust strategic direction and developments that have occurred in the Tees Rehabilitation services since the Quality Improvement held in August 2017.

Developments within the current service have led to a reduction in the length of inpatient stay, improved access to service, the development of a process that has ensured people have been cared for within their own community through returning people from Independent Hospitals and ensuring only those that have required a continuing care environment, or have an acquired brain injury or degenerative disorder have been transferred to independent hospitals.

A future model is proposed within the paper which is consistent with best practice in Rehabilitation and the elimination of locked Rehabilitation wards. It reflects the Trust wide approach to developments in Rehabilitation and Recovery Services and is consistent with the National position. The service aims to go beyond the original scoping of NICE guidance recognising the role of family, friends and carers and social integration in promoting recovery, in line with the Framework for Community Mental Health Support, Care and Treatment due to be published by the National Collaborating Centre for Mental Health.

The proposed model is to reduce the number of inpatient rehabilitation beds and reinvest to provide an enhanced community rehabilitation service expanding the service and extending its hours of operation to be available from 08.00 – 22.00hrs over 7 days, ensuring increased capacity for referrals and more intensive support to recovery programmes. In addition reinvestment will take place within the remaining inpatient facility to support the increased complexity of service users and the seamless rehabilitation and recovery pathway thus enabling further improvements in length of stay and patient experience.

## **2.0 Background**

### **2.1 National Context**

NICE are expected to publish guidelines on Rehabilitation for people with severe and enduring mental illness in the summer of 2020. The published draft scope, including the NHS England and NICE definitions of Rehabilitation focus on enabling people to maximize their potential to live a full and active life within their family, community and education or workplace. The rehabilitative process emphasises a whole systems approach which includes inpatient and community components and supports individuals to progress in their recovery by encouraging their skills, functioning and autonomy, in order to give them hope for the future and which leads to successful community living and social inclusion.

In 2017 the Care Quality Commission's published a document that highlights the disadvantages of locked rehabilitation services and indicates the need for intensive community support for this population in suitable accommodation.

In 2019 the NHS 10 year implementation plan brought community rehabilitation services into the broader community mental health services standards for the first time.

### **2.2 Tees, Esk and Wear Valley's NHS Trust Position**

In 2017 Tees, Esk and Wear Valley's NHS Foundation Trust completed a Trust wide Rehabilitation Review which provided a comprehensive overview of the current service provision including locality based needs. This included an analysis of demand to reflect both expected prevalence (based on population) along with actual demand to Trust rehabilitation services; and the financial implications of external care packages.

Analysis of the provision and demand within each locality was used to develop options to improve the rehabilitation offer; ensuring that the Trust is able to provide localised services to service users with complex needs reducing the requirement for external care packages in line with national guidance. The Trust agreed an internal structure to lead and manage the further identified areas of development of the rehabilitation pathway.

The Trust wide review highlighted 5 key areas to be developed:  
Person Centred needs identification;  
Collaboration and Partnerships;  
Workforce / skill set;  
Culture and values;  
Pathways.

The work is in keeping with the Framework for Community Mental Health Support, Care and Treatment due to be published by the National Collaborating Centre for Mental Health, which aims to deliver greater integration with other services that impact on mental health and wellbeing outcomes.

## **2.3 Tees Position**

Following the Trust wide review Teesside rehabilitation services held a quality improvement event in August 2017. Its purpose was to develop a vision for Adult Mental Health (AMH) Rehabilitation Services in Teesside aligned with the wider Trust vision for rehabilitation and recovery.

The Teesside rehabilitation service offer at that time:

- 8 Teesside beds at Kirkdale ward, a locked male service.
- 20 beds at Lustrum Vale, a mixed sex ward contracted for Teesside only.
- A Teesside Rehabilitation Community Team (RCT).
- 7 Teesside beds Fulmar ward, a locked female Trust wide service (managed by Forensic Mental Health services).

## **3.0 Teesside Developments to date**

The outcomes created at the Quality improvement (3P) event focused on localised services allowing service users to be connected to their local community and build recovery around them. This was in keeping with current developments and approaches to Rehabilitation and reflected the need to reduce length of stay and admissions to beds outside a patient's local area and in line with the national view. Service User's and carers contributed to the development of the vision both in the preparation for and during the event and continue to contribute to the process.

## **3.1 Service Ethos**

The vision of care described within the Quality Improvement event has enabled an inclusive approach to service users who traditionally would have been declined rehabilitation services, often leading to a non-NHS placement. The vision has led to a change in a model of care improving access for those people who would have been excluded due to diagnosis, or a previous rehabilitation inpatient stay.

The rehabilitation service has worked to ensure one referral pathway into rehabilitation to prevent repeated and unnecessary assessments. A weekly access management meeting occurs which ensures the individual commences the correct rehabilitation pathway in a timely manner and monitors the progress of individual service users to community integration through the identification and management of any system blockages to progression.

This approach has significantly reduced waiting times for service users in accessing inpatient rehabilitation services and has supported the wider Tees services in reducing the length of stay for service users on acute wards awaiting rehabilitation.

The rehabilitation service has also developed a process that undertakes a review and assessment of all patients where a referral to be transferred to independent hospitals has been made. Since commencement of this process the only people that have been transferred to independent hospitals have been those that have required a continuing care environment, or have an acquired brain injury or degenerative disorder. Both Rehabilitation Inpatient services and the Rehabilitation Community Team have worked with individuals to develop and implement behavioural support plans and approaches. These approaches are then used to support external providers of non-hospital placements, ensuring the care setting chosen is the least restrictive environment.

In addition to the process undertaken in relation to individuals being referred to Independent Hospitals the service also supported the review of individuals currently being supported in Independent Hospitals this led to individuals being transferred back into Trust rehabilitation services.

The change in ethos and the training delivered have led to a reduction in lengths of stay on both inpatient wards. The average Length of stay on Lustrum Vale for the year 2016/ 2017 was 258 days, for the year 2017/ 2018 the average length of stay reduced to 172 days. The length of stay on Kirkdale has reduced by approximately 50% from an average stay of 700 days to 350 days. The figures for 2018/2019 are 302 for Lustrum Vale (range 98 – 931) and 358 for Kirkdale (range 130-1294). The range is given as a small number of patients have exceeded expected Length of Stay due to complexity of need.

For the year 1st May 2017 to 30th April 2018 average occupancy for Lustrum Vale was 95% and 88% for Kirkdale. Kirkdale did have a period of under occupancy in December, January, and February (73%, 63% and 65% respectively). The figures for 2018/19 are 90% for Lustrum Vale (range 73-100%) and 80% for Kirkdale (range 56-99%). The average bed occupancy prior to the transfer of patients from Independent Hospitals was approximately 62%.

In the same period there was further female provision, however due to changes in approach to those diagnosed with personality and relational difficulties this provision is no longer required.

#### **4.0 Proposed Rehabilitation Service Model**

The change in service vision and ethos in line with national guidance has demonstrated benefits to service users through reduced lengths of inpatient stay and increased access to service enabling service users to be supported in their recovery within their local area.

It is proposed to continue the development of service provision to meet the national context of reducing the number of locked rehabilitation beds and increased focus on intensive and integrated community rehabilitation services. The proposed model is to enhance the community rehabilitation and recovery service to provide increased access to community based rehabilitation for service users and carers.

In order to achieve this vision it is proposed that the current inpatient bed provision will be reduced. This will result in a reduction of 8 Tees rehabilitation

beds. All inpatient service provision for Teesside will be delivered via the 20 beds available within Lustrum Vale.

The service has demonstrated reduction in length of inpatient stay and the reduction in beds will enable reinvestment into the community rehabilitation service expanding the service and extending its hours of operation to be available from 08.00 – 22.00hrs over 7 days, ensuring increased capacity for referrals and more intensive support to recovery programmes. In addition reinvestment will take place within the remaining inpatient facility to support the increased complexity of service users and the seamless rehabilitation and recovery pathway thus enabling further improvements in length of stay and patient experience.

Over the past two years there has been an increase in referrals to the Rehabilitation Community team from assessment and treatment wards and community mental health teams in addition to those from the Rehabilitation wards. This reflects the recognition that active and intensive support in the community of those service users with rehabilitation needs enables service users to develop and maintain optimum functioning and management of symptomatology and live in the least restrictive accommodation.

The service has also noted that a significant number of services users do not have ongoing contact with families or a supportive community network (currently only 28% of patients on Kirkdale and 50% of patients have family/community contact). In order for ongoing recovery and successful discharge it is vital that service users are supported to make connections in the community (CHIME framework for personal recovery).

Rehabilitation services in Teesside is currently largely bed based (two wards) and a small community service the aim is to reduce the bed base to enable transfer of staffing resources to an enhanced community team to enable the service to work with service users in the community where support to build functional skills and community connections for sustained recovery can be achieved.

In the year January 2018 – 2019 there were 36 admissions to Rehabilitation Beds). For the period 1st January 2019 – 31st May 2109 there were 5 admissions (1 Hartlepool, 1 Stockton, 2 Middlesbrough and 1 R&C) which shows a significant reduction in admissions.

This is balanced by the increase in accepted referrals to the community team which was 39 for the year for the full year in 2018. There has been 42 referrals accepted so far exceeding the previous year's full year total in the first 6 months of year. Current RCT caseload stands at 48.

Service users and carers have been key to the developments of the new service model over the last few years. Service user and carers were involved in a 3P modelling event from the beginning with generating ideas for the proposal, attendance and feedback at the event and ongoing discussions. Continuous service user and carer feedback has supported the establishment of the Rehabilitation Community team and allowed evaluation of service delivery. A number of service users and carers have been identified who are willing to be

involved in the ongoing development of the service via focus groups and involvement in service improvement events.

For many of the service users who come to rehabilitation services there is a history of repeated admissions and failed placements creating significant anxiety around discharge and independent living the value of an enhanced Community Rehabilitation Service to work with service users through the transition period and recovery within the community cannot be underestimated.

Feedback for RCT has been very positive from families about their view of the positive impact of service delivery within the community environment.

“You’re not like other teams, you’re there, down to earth and so much less threatening”

“That OT Thing (VDT MOCA) and the team has really helped in making sure she got the care and support she needed”

“he has come on leaps and bounds since working with RCT. I have noticed a big difference in him wanting to get involved”.

“I can really see the benefit from the RcT input – it really helped my son but it also helped me, it has really taken the pressure off me and we can have a better Mum / son relationship”.

“I think getting to know my son when he was on the ward helped – you got to know him and built trust so that he wasn’t scared to do things when he left. He’s going swimming and to the gym and is also doing things for himself in the home which takes the pressure off me. I think the time you have been able to give really helped, I don’t think I could have managed him at home without you helping”

## **5.0 Finance**

There are no financial impacts of the proposals. The proposal is the re-provisioning of the whole staffing resource to significantly increase the staffing of the Rehabilitation Community Team and to also increase staffing levels at Lustrum Vale to enhance inpatient care delivery.

## **6.0 Conclusions**

The proposed Tees Rehabilitation and Recovery Model supports the achievement of National Guidelines through the reduction of locked inpatient rehabilitation services and the development of community based rehabilitation and recovery services that enable the individual to complete their recovery within their local community promoting social inclusion and successful community living through a whole systems integrated approach.

# TEES VALLEY JOINT HEALTH SCRUTINY COMMITTEE

2 September 2019

**Report of:** Statutory Scrutiny Manager

**Subject:** Direct Access to Hearing Services – Contract Award

---

## 1. PURPOSE OF REPORT

- 1.1 To provide the Committee with the following update on the process involved in the Direct Access to Hearing Services contract award as provided on behalf of the local Clinical Commissioning Groups.

## 2. UPDATE

- 2.1 The five Clinical Commissioning Groups (CCGs) (South Tees, Hartlepool and Stockton on Tees, Darlington, DDES and North Durham) are working collaboratively to undertake a review and re-procurement of Adult Hearing (Age Related) services in line with contractual requirements. In October 2018, a presentation was provided to the Joint Committee regarding the current service delivery model, evaluation from market and public engagement and members were presented with an overview of the proposed community model to be commissioned. The CCGs have since progressed with a robust procurement process in line with the timetable shared but unfortunately, due to the unprecedented level of clarification questions received from providers during the process, it was deemed appropriate to pause and stop the process. The CCGs have deemed it appropriate to undertake further market engagement with potential providers and utilise the time this offers to undertake further analysis of current activity and demand, alongside offering providers further opportunities engage with the CCGs regarding a procurement process itself, the structure and for commissioners to share appropriate guidance for completion of such a process.
- 2.2 A further timetable has been drafted and commissioners are hopeful that a successful procurement process will be completed meaning that following a mobilisation period, new commissioned services will be implemented by July 2019. The updated timetable will be circulated to the Committee as soon as it is available. It is important to note that there is no loss of current service during this process and that patients are still able to access this community service across locality areas. Services continue to be managed and monitored against agreed existing service specifications and quality requirements.

- 2.3 A further update is scheduled to be presented to the Committee at the meeting in March 2020.

**3. RECOMMENDATIONS**

- 3.1 That the updated timetable be circulated to the Committee as soon as it is available.
- 3.2 The update provided be noted with a further update to be provided to the Joint Committee at the meeting in March 2020.
